

PSYCHOLOGY
Year 11 ATAR UNIT 1
Question/Answer Booklet

SEMESTER TWO EXAM 2023

Student Number: In figures:

--	--	--	--	--	--	--	--

In words:

Time allowed for this paper

Reading time before commencing work: ten minutes

Working time: two hours and thirty minutes

Materials required/recommended for this paper

To be provided by supervisor

This Question/Answer booklet

To be provided by student

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters

Special items: non-programmable calculators approved for use in this examination

Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised material. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

Structure of this paper

Section	Suggested working time	Number of questions available	Number of questions to be attempted	Marks	% weighting
Section One	120 minutes	8	8	115	70
Section Two	60 minutes	3	2	47	30
Total marks					100

Instructions to candidates

1. The rules for the conduct of Western Australian external examinations are detailed in the *Year 12 Information Handbook 2023*. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in this Question/Answer Booklet preferably using blue/black pen. **Do not use erasable or gel pens.**
3. Answer the questions according to the following instructions.

Sections One and Two: Write your answers in this Question/Answer booklet. Wherever possible, confine your answer to the line spaces provided.

Section Three: Consists of two questions. You must answer **both** questions.
4. You must be careful to confine your answers to the specific questions asked and to follow any instructions that are specific to a particular question.
5. Supplementary pages for planning/continuing your answers to questions are provided at the end of this Question/Answer booklet. If you use these pages to continue an answer, indicate at the original answer where the answer is continued, i.e. give the page number.

Section One: Short Answer**70% (115 marks)**

This section has **eight (8)** questions. Answer **all** questions. Write your answers in the spaces provided.

Supplementary pages for the use of planning/continuing your answers to questions are provided at the end of this Question/Answer booklet. If you use these pages to continue an answer, indicate at the original answer where the answer is continued, i.e. give the page number.

Suggested working time: 120 minutes.

Question 1**(25 marks)**

After seeing her class daydreaming during her lesson, a teacher asked her students why they were not focusing. They said that they hadn't had enough sleep. The teacher decided to research this and asked her Year 12 class if they thought more sleep would help them to focus.

She asked 40 Year 12 students "Do you focus better or worse when you sleep more than 8 hours a night?"

Her results are below.

Response to question: "Do you focus better or worse when you sleep more than 8 hours a night"

Better	Worse
32	8

a) Explain whether the study should have a directional or a non-directional hypothesis.

(2 marks)

- b) Explain why using stratified sampling could improve the above study. (2 marks)

The teacher decided to follow this study further and asked students to record the number of hours of sleep they had the night before. She then gave them a memory test of 20 questions.

The results are recorded below:

Participant	Number of hours of sleep	Memory test score /20
1	8	18
2	7	16
3	5	12
4	4	8
5	8	15
6	7	16
7	6	11
8	10	19

- c) Calculate the mean values for amount of sleep, and for scores on the memory test. (2 marks)

Sleep

Memory score

- d) Calculate the median values for amount of sleep, and for scores on the memory test.
(2 marks)

Sleep

Memory score

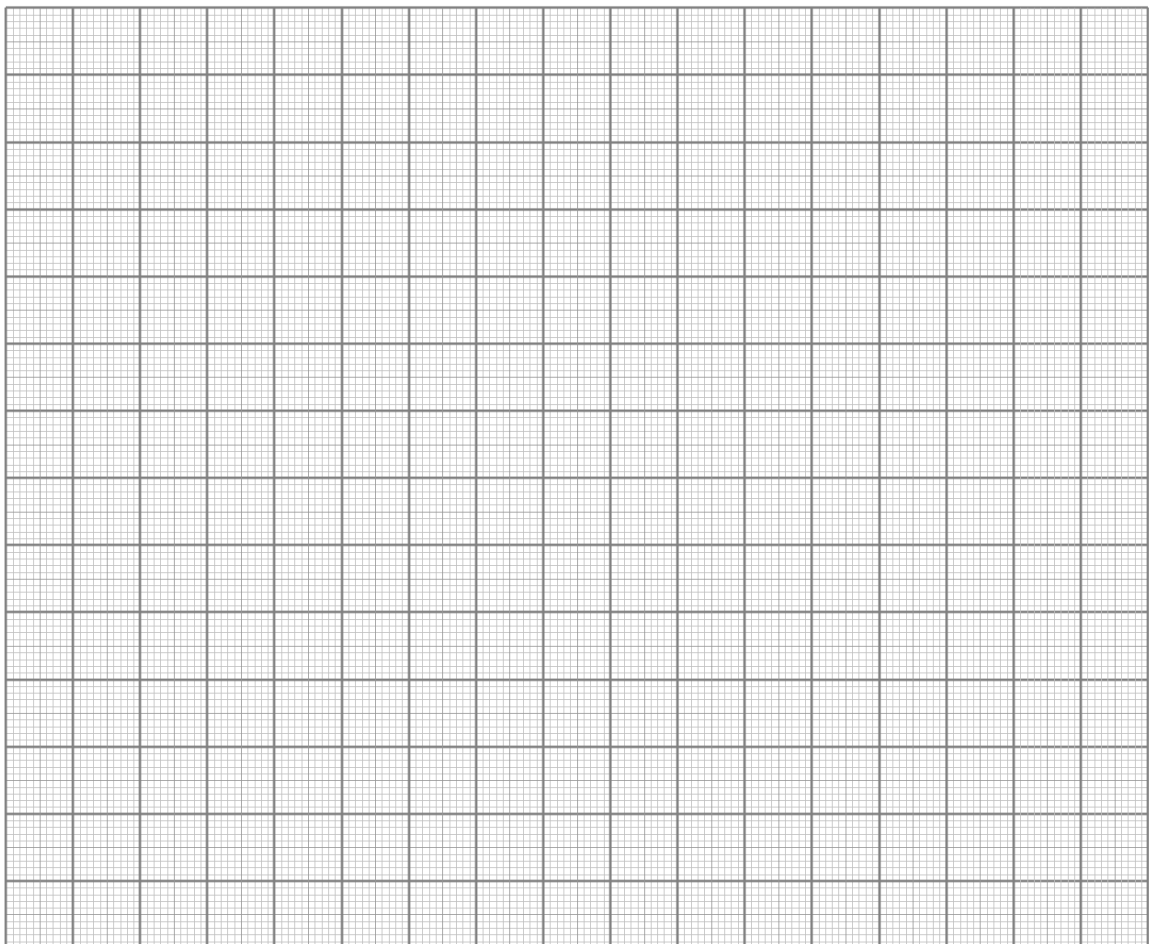

- e) Identify **one (1)** extraneous variable that the researcher should have controlled. How could this variable affect the study.
(3 marks)

- f) Explain the concept of informed consent and how this would be used in the above experiment.
(3 marks)

- g) Identify the type of data collection used and state **one** advantage and **one** disadvantage of this type. (3 marks)

- h) Using the grid provided, draw an appropriate graph for the data in the table on the previous page. (6 marks)

Note: A spare grid is provided on page 30. If you need to use it, cross out this grid.

- i) Describe the relationship of the correlation from the graph. (2 marks)

Question 2**Total 12 marks**

Milly was running through the bush when she felt a snake brush past her leg. She immediately stopped and stood still.

- a) Explain the role of sensory neurons, interneurons and motor neurons in Milly's scenario. (6 mark)

- b) Explain what part of the autonomic nervous system would have kicked in once Milly was safe at home, and list **four** psychological responses Milly would then experience. (6 marks)

Question 3**Total 11 marks**

Fill in the functions of the brain structures in the table below:

(5 marks)

Brain structure	Function
Medulla	
Hypothalamus	
Broca's area	
Primary motor cortex	
Primary Sensory cortex	

Roger Sperry famously researched the brain by using the split-brain experiment.

b) Explain the function of the corpus callosum.

(2 marks)

- c) Identify and explain **two** contemporary methods to improve our knowledge of the structure and function of the brain. (4 marks)

Question 4**Total 12 marks**

- a) Identify the roles of the following types of brain plasticity in infancy. (2 marks)

Adaptive plasticity:

Developmental plasticity:

b) Identify and explain the stages of brain plasticity.

(10 marks)

Question 5

Total 12 marks

a) Bowlby developed a theory on attachment in 1969. Explain the following findings from his research: (2 marks)

i) Monotropy

ii) Maternal Deprivation

b) State the aim of Harlow's study using rhesus monkeys. (2 marks)

c) Explain the findings of Harlow's study using rhesus monkeys. (4 marks)

d) Identify **two** strengths and **two** limitations of Harlow's study. (4 marks)

Question 6**(16 marks)**

Jos is known by others as a risk-taker who enjoys dangerous sports; especially those involving high speeds, such as motor racing. He has had several minor accidents when driving on local roads. While driving close to home with his two closest friends (who are known to be very careful people), he is involved in a car accident in which no-one is hurt. His friends attribute the accident to his risk-taking behaviour.

- (a) Explain the attribution Jos' friends have made according to Heider's theory. (2 marks)

When the police investigate the accident, it is found that Jos was not the cause of the accident and was complying with all road rules. His friends struggle to accept that this is true.

- (b) Name and describe the key concept of the social psychology theory proposed by Leon Festinger. (2 marks)

- (c) Apply Festinger's theory to explain why Jos's friends struggle to accept the findings of the police report. (2 marks)

- (d) Refer to Festinger's theory to explain **two** ways in which Jos's friends could accept the report's findings. (4 marks)

One: _____

Two: _____

- (e) i) Describe the results of Festinger and Carlsmith's cognitive dissonance study. (2 marks)

- ii) Explain Festinger and Carlsmith's findings. (4 marks)

Question 7**(12 marks)**

(a) Define the term 'social influence'.

(1 mark)

(b) Name the researcher who came up with the three levels of social influence.

(1 mark)

(c) State and describe the highest level of social influence.

(2 marks)

(d) Fill in the table regarding their most famous studies.

(4 marks)

	Solomon Asch	Stanley Milgram
Contribution to the study of psychology		
Results		

(e) Both Asch and Milgram used confederates in their studies.

i) Explain what a confederate is.

(1 mark)

ii) The use of confederates is a type of deception. Explain what deception is and describe what a researcher must do if deception is used in their study. (3 marks)

Question 8

(15 marks)

(a) State three personal characteristics and explain how they each influence prosocial behaviour. (6 marks)

(b) List two other factors that influence prosocial behaviour.

(2 marks)

Jenny is at a local soccer game cheering on her friend's new team, when she starts to feel dizzy and collapses. Although there are many people around including players, coaches and a few other spectators, nobody immediately helps until her friend notices and rushes to her aid. The paramedics are called and fortunately Jenny gets the medical attention she needs.

- (c) Name the phenomenon that has occurred in this scenario. (1 mark)

A local news station interviews some of the witnesses.

- (d) For each witness, state and explain the factor that has influenced their behaviour of not helping. (6 marks)

- i) Gregory said he wanted to help but was afraid some of the others might judge him if he did something wrong.

- ii) Jamie said she assumed someone else would help as there were quite a few people closer to the incident than she was.

- iii) Georgie said that as nobody else was helping she assumed that she was overreacting so decided not to act.

End of Section One

Section Two: Extended Answer**30% (47 Marks)****Part A (10%)** One compulsory question. You **MUST** answer this question.**Part B (20%)** One question from a choice of two. You must **CHOOSE** one question to answer from the choice of two questions.

Suggested working time: 60 minutes

Write your answer to Question 8 on pages 18 - 21. When you have answered this question, turn to page 22 for Question 9 and 10 and write your answer to your chosen question on pages 23–30.

Question 8**22 marks**

Annabelle and Archie are siblings. Annabelle is 8 years old and Archie is 1 years old. When dropping Archie at day care, Annabelle noticed that he was playing with his toys when they left and didn't even say goodbye. Annabelle's mum told her that she was never like that, when Annabelle was picked up she would cling to her mum kicking and screaming.

- Identify and explain the stages of cognitive development the siblings would most likely be in and the corresponding abilities they would have according to Piaget. (6 marks)
- Identify and explain **one** Piagetian task that could be used to place the siblings in the correct stage. (2 marks)
- Identify the attachment types the siblings would have according to Ainsworth. (6 marks)
- Explain, using empirical evidence if patterns of attachment would be similar in different cultures. (4 marks)
- Quality of response (4 marks)

Question Number:

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question Number:

[illegible]

Answer ONE of the following:

☐

Question 9

(25 marks)

Being a member of a group can be very beneficial to our self-esteem, but group membership can also lead us to make negative judgements of those who are not part of the group. Social identity theory can be used to explain the benefits and drawbacks to our tendency to form groups.

Discuss the above statement. In your answer you should:

- Name the theorist who proposed social identity theory. (1 mark)
- Define the term 'social identity'. (1 mark)
- Explain each of the stages of social identity theory. (12 marks)
- Explain how our social identity can be beneficial to our self esteem. (2 marks)
- Define prejudice and explain how social identity can lead to prejudice. (3 marks)
- Explain one strength and one limitation of social identity theory. (2 marks)
- Quality of response. (4 marks)

OR

☐

Question 10

(25 marks)

Prejudice and discrimination are unfortunately still rife in society. By understanding the causes and ways of reducing prejudice we can help to combat this problem.

Discuss the above statement. In your answer you should:

- Differentiate between stereotypes, prejudice and discrimination. (3 marks)
- Explain the just-world phenomenon and how it leads to prejudice. (2 marks)
- Name a researcher who did a study looking at intergroup competition. (1 mark)
- Describe how intergroup competition can lead to prejudice. (2 marks)
- Explain the key findings of each stage of the intergroup competition study. (9 marks)
- List four ways that prejudice can be reduced. (4 marks)
- Quality of response. (4 marks)
