

WILLETTON SENIOR HIGH SCHOOL

SEMESTER ONE 2015 EXAMINATION MARKING KEY

PSYCHOLOGY Stage 3

Student Name: _____

Time allowed for this section

Reading time before commencing work: 10 minutes

Working time for this section: 3 hours

Materials required/recommended for this section

To be provided by the supervisor

This Question/Answer Booklet

To be provided by the candidate

Standard items: Pens, pencils, pencil sharpener, eraser, correction fluid, ruler, highlighters

Special items : Calculators satisfying the conditions set by the Curriculum Council for this course

Important note to candidates

No other items may be used in this section of the examination. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

STRUCTURE OF THIS PAPER

Section	Suggested working time	Number of questions available	Number of questions to be answered	Marks	% weighting	Raw Score	% Score
Section One: Research Methods	30 minutes	3	3	30	20	$\frac{\quad}{30}$	%
Section Two: Short Answer	90 minutes	5	5	75	55	$\frac{\quad}{75}$	%
Section Three: Extended Response	60 minutes	2	2	50	25	$\frac{\quad}{50}$	%
Total Marks				145	100	$\frac{\quad}{154}$	%

PERCENTAGE SCORE: _____/100

INSTRUCTIONS TO CANDIDATES

1. Sitting this examination implies that you agree to abide by the school's rules for the conduct of examinations.
2. Answer all questions by writing your answers in this booklet in the spaces provided.
3. You must be careful to confine your responses to the specific questions asked and to follow any instructions that are specific to a particular question.
4. Spare answer pages may be found at the end of this booklet. If you need to use them, indicate in the original answer space where the answer is continued (ie give the page number).

SECTION ONE: RESEARCH METHODS (20 marks)

This section has **THREE (3)** questions.
Attempt **ALL** questions.

Suggested working time: 30 minutes

Question 1 (10 marks)

Dr. Parker was interested in determining the relationship between involvement in extracurricular school activities and self-esteem. He collected his data using self-report questionnaires to obtain measures of self-esteem and the number of hours spent on extracurricular school activities per week from 300 high school students who volunteered to participate.

- (a) Provide a research hypothesis for this study. (1 mark)

- (b) What sampling method was used in this study? (1 mark)

- (c) Provide **one** strength and **one** limitation of using this method of selecting participants.

- (i) strength: (1 mark)

- (ii) limitation: (1 mark)

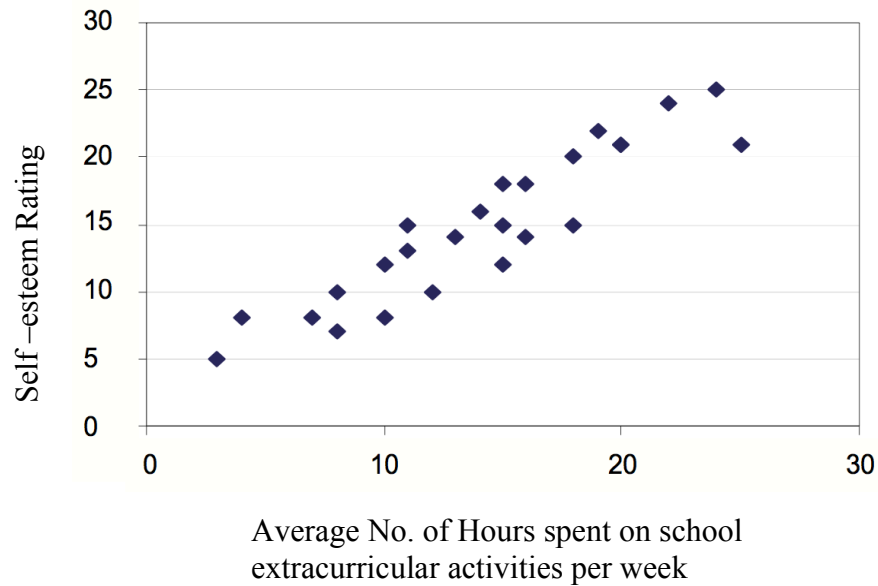

- (d) State **one** advantage and **one** disadvantage of the data collection method that Dr. Parker used.

- (i) advantage: (1 mark)

- (ii) disadvantage: (1 mark)

Question 1 (continued)

The results of the study are shown in the scattergram below:

- (e) (i) Identify the strength and direction of the relationship between the two variables shown in the scattergram. (1 mark)

- (ii) Do the results shown in the scattergram support the hypothesis stated in Question 1 (a)? (1 mark)

- (f) State a conclusion that Dr. Parker could make based on the results. (1 mark)

- (g) Describe a limitation of the research design used in this study that affects the conclusion drawn from the results. (1marks)

Question 2 (14 marks)

Professor Zheng of Brightland University wanted to test whether a vitamin supplement helped to improve students' grades. To test her idea, she told her class she was giving them all a supplement that would make them smarter. **She told them they all had to participate** and discussed the details of the experiment with them.

Professor Zheng divided the class into two equal groups. Group A received the vitamin supplement and Group B received an inactive substance (sugar pill).

Over the two-week trial, Professor Zheng spent a lot of time with the students gathering data. She was excited to find that the results showed that all *students' grades* had improved. She concluded that the vitamin supplement had worked.

(a) Identify

(i) the independent variable for this study. (1 mark)

(ii) the dependent variable for this study. (1 mark)

(b) Provide an operational hypothesis for this study. (2 marks)

(c) Identify a right of the participants that Dr. Zheng overlooked in her research. (1 mark)

(d) (i) Identify the term that refers to a substance with no known medical effects used as a control in an experiment. (1 mark)

Question 2 (continued)

(ii) Explain why Professor Zheng gave one group a substance with no known medical effects. (1 mark)

(e) (i) What do research psychologists mean when they describe research results as **valid**? (1 mark)

(ii) Was Professor Zheng's conclusion valid? _____ (Yes or No) (1 mark)

(iii) Why / why not? Explain your answer. (3 marks)

(f) (i) Identify **one** source of error in the design of this experiment. (1 mark)

(ii) Describe how you can modify the experiment to eliminate or minimize the effect of the source of error identified above [(f) (i)] (1 mark)

Question 3. (6 Marks)

(a) When is it acceptable to use **deception** in psychological research?

(1 mark)

(b) When deception is used, what action should a psychologist take with the participants at the conclusion of the research?

(1 mark)

(c) Outline **two** pieces of information about a research study that a researcher must provide to participants before they can give informed consent.

(2 marks)

(d) Who provides informed consent when a participant is less than 18 years of age?

(1 mark)

(e) Confidentiality is an ethical issue that is strictly upheld in all research involving human participants. Give **one (1)** important reason why this is done.

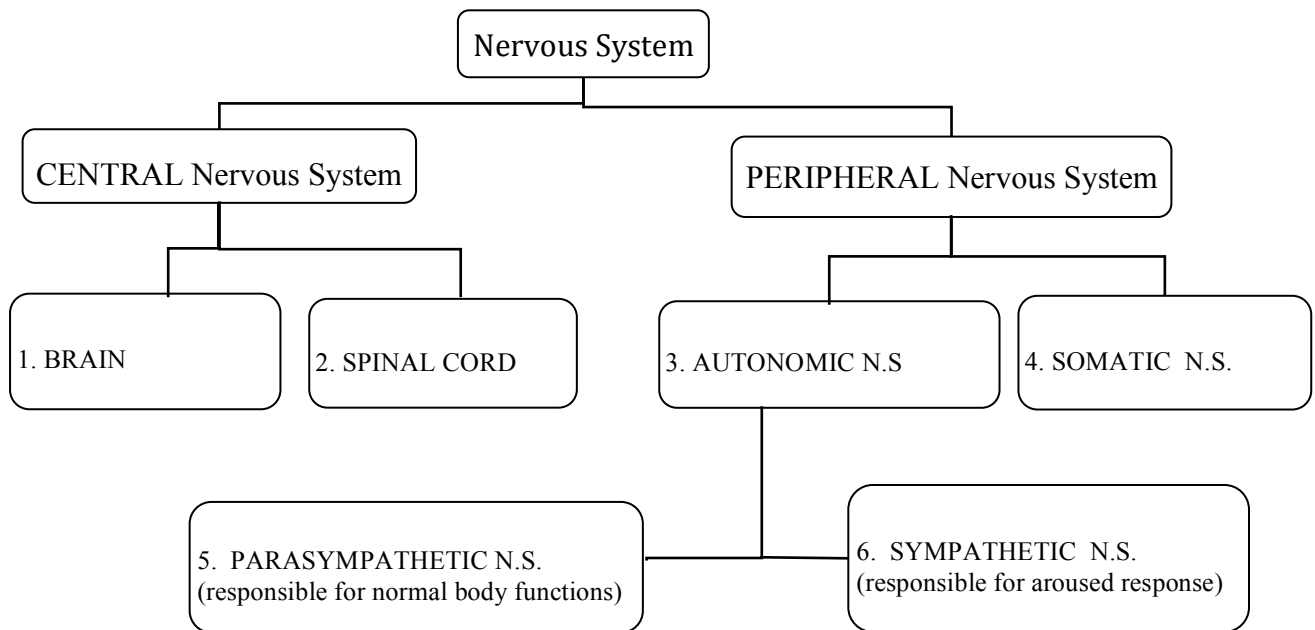

(1 mark)

SECTION TWO. SHORT ANSWER (Marks)

This section has **FIVE (5)** questions. Attempt **ALL** questions.

Question 4: Biological Influences (14 marks)

- (a) Given below is a diagram summarizing the main parts of the nervous system. Provide the missing information. (4 marks)

- (b) Name the four lobes of the cerebrum and state the function of each lobe. (4 marks)

Lobe of the Brain	Function
FRONTAL	IS RESPONSIBLE FOR REASONING, LOGICAL THINKING, PLANNING, PROBLEM SOLVING, EXECUTIVE FUNCTIONS
PARIETAL	PROCESSES & INTERPRETS SENSORY INFORMATION
OCCIPITAL	PROCESSES AND INTERPRETS VISUAL INFORMATION
TEMPORAL	PROCESSES AND INTEPRETS AUDITORY INFORMATION

Question 4 (Continued)

- (c) Explain the significance of research involving animals to the understanding of the anatomy and physiology of the human brain. (2 marks)

ANY TWO OF THE FOLLOWING: (1 MARK FOR EACH CORRECT RESPONSE)

- ANIMALS HAVE SIMILAR NERVOUS SYSTEM/BRAIN STRUCTURE AS HUMANS ALLOWING ACCURATE EXTRAPOLATION OF RESULTS FROM ANIMAL STUDIES TO HUMANS (1)
- ANIMALS HAVE SHORTER LIFESPAN ALLOWING LONG TERM EFFECTS OF DRUGS OR TREATMENTS TO BE OBSERVED IN A SHORTER TIME (1)
- THERE ARE LESS ETHICAL RESTRICTIONS WHEN WORKING WITH ANIMALS ALLOWING RESEARCHERS TO USE TREATMENTS OR MANIPULATIONS THAT ARE NOT POSSIBLE WITH HUMAN SUBJECTS. (1)
- ANIMALS HAVE SIMPLER STRUCTURES AND NEURAL NETWORKS THAT ALLOWS MORE DIRECT CAUSE AND EFFECT OBSERVATIONS. (1)

- (b) Describe the role of Broca's and Wernicke's Area in speech and language. (2 marks)

(1 MARK) BROCA'S AREA IS RESPONSIBLE FOR UNDERSTANDING SENTENCE STRUCTURE AND ARTICULATING WORDS

(1 MARK) WERNICKE'S AREA IS RESPONSIBLE FOR COMPREHENDING LANGUAGE AND ACCESSING MEMORY TO FORM OR USE LANGUAGE IN COMMUNICATION.

- (d) Describe **two** effects of exercise on the nervous system. (2 marks)

ANY TWO OF THE FOLLOWING (1 MARK FOR EACH CORRECT RESPONSE)

- EXERCISE STIMULATES THE RELEASE OF DOPAMINE AND PRODUCTION OF ENDORPHINS GIVING A PLEASURABLE FEELING (RUNNER'S HIGH)
- EXERCISE INDUCES THE PRODUCTION OF BRAIN STEM CELLS IN MICE
- EXERCISE IMPROVES THE HEALTH OF THE HIPPOCAMPUS IMPROVING MEMORY
- EXERCISE WAS HIGHLY CORRELATED WITH IMPROVEMENTS IN COGNITIVE ABILITIES AND LEARNING

Question 5. Personality (14 marks)

- (a) How do psychologists define 'personality'? (1 mark)

PERSONALITY IS THE CHARACTERISTIC WAYS/PATTERNS OF THINKING, FEELING AND ACTING THAT MAKES ONE AN INDIVIDUAL.

- (b) Psychologists have different interpretations of what factors contribute to personality. Some say it is heredity, others say it is the environment. Explain what determines personality according to **each** of the following theories.

(i) Trait theory

(2 marks)

ANY TWO OF THE FOLLOWING POINTS:

- TRAITS ARE STABLE CHARACTERISTICS THAT SHOW SOME DEGREE OF CONSISTENCY OVER TIME AND ACROSS SITUATIONS.
- TRAITS EXIST IN A CONTINUUM MARKED BY OPPOSITE EXTREMES IN BEHAVIOUR
- VARIATIONS IN PERSONALITY IS DUE TO DIFFERENCES IN THE EXPRESSION OF EACH TRAIT RELATIVE TO THE CONTINUUM OF THE 2 EXTREMES.
- TRAITS HAVE BEEN SHOWN TO BE INHERITED (HAVE GENETIC BASIS)

(ii) Humanistic theory

(2 marks)

ANY TWO OF THE FOLLOWING POINTS:

- EACH PERSON IS BORN GOOD AND WILL SEEK TO ATTAIN SELF-ACTUALIZATION
- PERSONALITY IS DETERMINED BY HOW CLOSELY A PERSON MEETS THE REQUIREMENTS OF SELF-ACTUALIZATION
- THE QUALITY OF ONE'S ENVIRONMENT AS ONE GROWS OLDER INFLUENCES HOW ONE'S PERSONALITY DEVELOPS

(iii) Psychodynamic theory

(2 marks)

ANY TWO OF THE FOLLOWING POINTS:

- PERSONALITY DEVELOPS FROM ONE'S CHILDHOOD EXPERIENCES
- PERSONALITY IS COMPOSED OF THE ID, EGO & SUPEREGO. ONE'S BEHAVIOUR IS DICTATED BY WHICH COMPONENT IS MORE DOMINANT.
- PERSONALITY DEVELOPS THROUGH A SERIES OF PSYCHOSEXUAL STAGES.

- (c) Describe **one** way in which an understanding of personality is useful to a Year 12 student. (1 mark)

ANY ONE OF THE FOLLOWING (BUT NOT LIMITED TO THE GIVEN):

- IT WILL HELP IN CHOOSING THE RIGHT SUBJECTS OR CAREER PATH
- IT WILL HELP IN UNDERSTANDING HOW ONE WILL REACT IN SITUATIONS AND PREPARE FOR EVENTUALITIES
- IT WILL HELP ONE BECOME MORE UNDERSTANDING & TOLERANT OF OTHER PEOPLE'S BEHAVIOURS

- (d) Describe the method used by the following theorists for measuring personality. (6 marks)

Personality Theorist	Description of Method for measuring Personality
Hans Eysenck	• MEASURES PERSONALITY USING A TWO DIMENSIONAL APPROACH. THE TWO DIMENSIONS ARE EXTRAVERSION – INTRAVERSION AND EMOTIONAL STABILITY – NEUROTICISM. (1) • METHOD OF MEASUREMENT INVOLVES A SELF-REPORT INVENTORY CONTAINING STATEMENTS OR QUESTIONS ABOUT ONE'S THOUGHTS FEELINGS & BEHAVIOUR WITH A RATING SCALE TO QUANTIFY ONE'S RESPONSE (1)
Carl Rogers	• MEASURES THE CONGRUENCE BETWEEN THE IDEAL SELF, SELF-IMAGE AND TRUE SELF (1) • USES THE Q-SORT WHICH IS A SELF-REPORT THAT CONTAINS WORDS OR PHRASES THAT ONE WILL CHOOSE FROM TO DESCRIBE ONE'S SELF (1)
McCrae & Costa	• MEASURES PERSONALITY USING 5 TRAIT DIMENSIONS: OPENNESS, CONSCIENTIOUSNESS, EXTROVERSION, AGREEABLENESS, NEUROTICISM (1) • METHOD OF MEASUREMENT INVOLVES A SELF-REPORT INVENTORY CONTAINING STATEMENTS OR QUESTIONS ABOUT ONE'S THOUGHTS FEELINGS & BEHAVIOUR WITH A RATING SCALE TO QUANTIFY ONE'S RESPONSE (1)

Question 6. Social Psychology (14 marks)

(a) Psychologists describe group behaviour using the following terms. Define each.

(i) Brainstorming (1 mark)

- GENERATING/SHARING OF IDEAS WHERE MEMBERS ARE ENCOURAGED TO BE UNINHIBITED/CREATIVE WITHOUT REGARD FOR PRACTICALITY

(ii) Cooperation (1 mark)

- INDIVIDUALS OR GROUPS WORKING TOGETHER TO ACHIEVE A COMMON GOAL.

(iii) Social Psychology (1 mark)

- SCIENTIFIC STUDY OF HOW INDIVIDUAL BEHAVIOUR IS INFLUENCED BY THE SOCIAL SITUATION

Question 6 (continued)

(b) Mr Singh was planning a science experiment for his class. He was not sure how to group the students, whether to use groups of 3 or groups of 6. Using your psychological understanding of the effect of group size on group behaviour, what advice can you give to Mr Singh?

- GROUPS OF 3 WILL BE MORE EFFECTIVE (1)

ANY ONE OF THE FOLLOWING REASONS:

- SCIENCE EXPERIMENTS REQUIRE DECISIVE ACTION THAT IS ACHIEVED BY HAVING SMALLER GROUPS (1)
- GREATER CHANCE THAT SOCIAL LOAFING WILL OCCUR IN A BIGGER GROUP. (1)

(c) Sandra is waiting in a long line at the supermarket checkout to pay for a box of chocolates. Sandra is tapping her foot quickly and sighing loudly. An onlooker observes Sandra's behaviour and thinks that she is a quick-tempered person.

(i) Explain, using attribution theory, why the onlooker is likely to think this. (2 marks)

- THE ATTRIBUTION THEORY CLASSIFIES ATTRIBUTIONS THAT PEOPLE BASED ON: INTERNAL DISPOSITIONS OR THE EXTERNAL SITUATION (1)
- THE ONLOOKER IS ATTRIBUTING SANDRA'S BEHAVIOUR TO HER INTERNAL DISPOSITION, I.E. HER PERSONALITY AS BEING QUICK TEMPERED (1)

(ii) Describe one alternative attribution for Sandra's behaviour. (1 mark)

ANY EXAMPLE OF AN ATTRIBUTION THAT IS BASED ON THE EXTERNAL SITUATION:

- SHE IS LATE FOR AN APPOINTMENT
- SHE NEEDS TO GO TO THE TOILET
- HER DOG MAY BE GETTING IMPATIENT IN HER CAR

(c) Explain, using attribution theory, how differences in attributions that people make can lead to conflict. (2 marks)

ANY TWO OF THE FOLLOWING POINTS:

- DIFFERENCES IN ATTRIBUTION CAN LEAD TO THE FUNDAMENTAL ATTRIBUTION ERROR (1)
- COMMITTING THE FUNDAMENTAL ATTRIBUTION ERROR CAN LEAD TO CONFLICT AND MISTRUST IN A RELATIONSHIP (1)
- PARTNERS IN A RELATIONSHIP WILL TEND TO ATTRIBUTE THEIR OWN BEHAVIOUR TO THE EXTERNAL SITUATION AND NOT TAKE RESPONSIBILITY FOR THE PROBLEM (1)
- HOWEVER, THEY TEND TO ATTRIBUTE THEIR PARTNER'S BEHAVIOUR TO INTERNAL DISPOSITIONS AND BLAME THEM FOR CAUSING THE PROBLEM. (1)

(d) Describe the 'state of cognitive dissonance' according to Festinger's cognitive dissonance theory. (2 marks)

ANY TWO OF THE FOLLOWING POINTS:

- COGNITIVE DISSONANCE OCCURS WHEN THOUGHTS, FEELINGS OR ACTIONS DO NOT COINCIDE
- BEING IN A STATE OF DISSONANCE IS UNPLEASANT / GENERATES TENSION
- INDIVIDUALS IN A STATE OF COGNITIVE DISSONANCE WILL SEEK TO RELIEVE THE TENSION BY MAKING JUSTIFICATIONS

(e) According to the cognitive dissonance theory, how can the size of a reward affect one's state of dissonance? (2 marks)

ANY TWO OF THE FOLLOWING POINTS:

- PROVIDES AN APPROPRIATE EXAMPLE TO SHOW THAT A LARGE REWARD WILL MINIMIZE THE DISSONANCE (1)
- PROVIDES AN APPROPRIATE EXAMPLE TO SHOW THAT A SMALL REWARD INCREASES THE STATE OF COGNITIVE DISSONANCE (1)
- DESCRIBES HOW THE DISSONANCE IS REDUCED WHEN A SMALL REWARD IS GIVEN (1)

Question 7. Relational Influences (14 marks)

- (a) Two brothers were arguing about who gets to use the family car. Name **three** different types of solutions that could be used to resolve this conflict and provide **one** example of each.

(6 marks)

NAMES THE TYPE OF SOLUTION (1 MARK)

PROVIDES AN EXAMPLE TO ILLUSTRATE THE NAMED TYPE OF SOLUTION (1 MARK)

- IMPOSED SOLUTION (1)
- EXAMPLE – THE OLDER BROTHER GETS TO USE THE CAR BECAUSE HE IS OLDER AND HAS BEEN DRIVING FOR A LONGER PERIOD OF TIME (1)

- DISTRIBUTIVE SOLUTION (1)
- EXAMPLE – ONE BROTHER USES THE CAR 3 DAYS A WEEK (M-W-F) AND THE OTHER USES THE CAR FOR THE OTHER 3 DAYS OF THE WEEK (T-TH-Sat)

- INTEGRATIVE SOLUTION(1)
- EXAMPLE – BOTH BROTHERS DISCUSS WHICH DAYS OF THE WEEK EACH ONE NEEDS THE CAR MOST. THEY FIND OUT THAT ONE BROTHER ONLY NEEDS THE CAR IN THE EVENINGS WHILE THE OTHER NEEDS THE CAR IN THE MORNINGS. THEY WORK OUT A TIME SCHEDULE WHERE EACH ONE HAS USE OF THE CAR WHEN THEY REALLY NEED IT. (1)

- (b) State **two** reasons why *counselling* is a better technique for helping partners in a relationship resolve their conflict.

(2 marks)

- COUNSELLING USES AN INTEGRATIVE SOLUTION WHERE INNER MOTIVATIONS AND UNDERLYING PROBLEMS ARE ADDRESSED WHILE NEGOTIATION USES A DISTRIBUTIVE SOLUTION WHERE A SHORT TERM IMMEDIATE SOLUTION IS ARRIVED AT. (1)
- COUNSELLING IS FACILITATED BY A PROFESSIONAL 3RD PARTY WHO CAN TEACH PARTNERS CONFLICT RESOLUTION TECHNIQUES AND COMMUNICATION SKILLS TO DEAL WITH ISSUES IN THE LONG TERM WHILE NEGOTIATION IS ONLY POSSIBLE IF CONFLICTING PARTIES ARE WILLING TO TALK TO EACH OTHER (1)

Question 7. (continued)

- (b) Elaine is starting Year 7 at a coeducational high school. Describe how Elaine's peer relationships are likely to change throughout high school using the first **three** of Dunphy's stages of the changing structure of social groups during adolescence. (6 marks)

NAMES THE STAGE ACCORDING TO DUNPHY (1/2 MARK)

APPLIES THE STAGE TO ELAINE'S HIGH SCHOOL EXPERIENCE (1 1/2 MARK)

STAGE 1 – FORMATION OF CLIQUES (0.5)

ELAINE BECOMES A MEMBER OF A CLIQUE – A GROUP OF 4 TO 10 GIRLS WHO FREQUENTLY INTERACT AND SHARE SIMILAR INTERESTS, ATTITUDES AND BELIEFS. HER CLIQUE IS EXCLUSIVE AND TENDS TO BE ISOLATED FROM OTHER CLIQUES. (1.5)

STAGE 2 – CROWD FORMATION (0.5)

ELAINE'S CLIQUE INTERACTS WITH OTHER CLIQUES TO FORM CROWDS WITH A COMMON INTEREST SUCH AS BEING FANS OF THE SAME FOOTBALL CLUB OR SIMILAR INTEREST IN MUSIC, DANCING OR A SPORT. MEMBERSHIP IN A CROWD REQUIRES PRIOR CLIQUE MEMBERSHIP. THEY CAN BE OBSERVED IN MALLS, BEACHES, PARTIES – PUBLIC AREAS WHERE TEENAGE BOYS & GIRLS INTERACT IN A CROWD. (1.5)

STAGE 3 – HETEROSEXUAL CLIQUE FORMATION (0.5)

HIGHER RANKING CLIQUE MEMBERS FORM HETEROSEXUAL CLIQUES. IF ELAINE IS A HIGH RANKING CLIQUE MEMBER, SHE MAY HAVE A BOYFRIEND/DATING PARTNER. DATING OCCURS WITHIN THE SAFETY OF THE HETEROSEXUAL CROWD. (1.5)

Question 8. Developmental Psychology (18 marks)

- (a) Name the stage of Piaget's theory of cognitive development that corresponds to each of the following characteristics (4 marks)

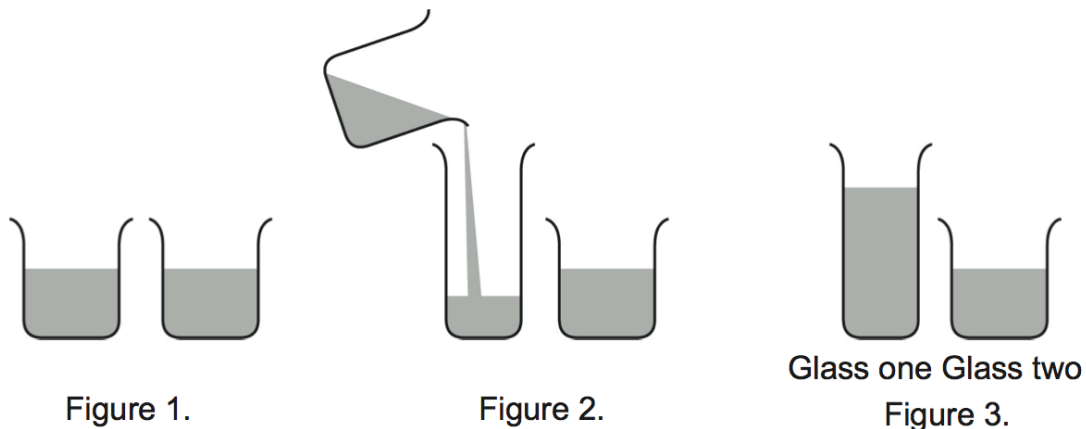

(i) Conservation: CONCRETE OPERATIONAL (1)

(ii) Object permanence: SENSORI-MOTOR (1)

(iii) Abstract thinking: FORMAL OPERATIONAL (1)

(iv) Egocentrism: PRE-OPERATIONAL (1)

- (b) A psychologist has two glasses that are the same shape and size and are filled with equal amounts of water (see Figure 1). The psychologist pours the water from one glass into a tall thin glass (see Figure 2). The psychologist asks two children whether Glass one or Glass two has more water in it or whether both glasses have the same amount of water. (see Figure 3).

Describe the response that each child would be **most** likely to give and explain the reason for the response.

- (i) Zach (age 4) (2 marks)

ZACH WILL RESPOND THAT GLASS ONE WILL HAVE MORE WATER THAN GLASS TWO. (1)

ZACH IS IN THE PRE-OPERATIONAL STAGE AND WILL TEND TO FOCUS ON ONLY ONE FEATURE OF AN OBJECT (HEIGHT OF THE GLASS) AND IS UNABLE TO SIMULTANEOUSLY INCLUDE OTHER FEATURES (WIDTH OF THE GLASS OR VOLUME OF WATER) IN HIS UNDERSTANDING OF PROCESSES. (1)

OR: ZACH IS UNABLE TO REVERSE A PROCESS AND CAN ONLY UNDERSTAND WHAT HE SEES NOW. HE CANNOT YET REPLAY THE MOTION OF WATER IN GLASS ONE AS COMING FROM THE GLASS THAT WAS THE SAME AS GLASS TWO. (1)

Question 8 (Continued)

(b) (ii) Hazel (age 10)

(2 marks)

HAZEL WILL RESPOND THAT BOTH GLASSES HAVE THE SAME AMOUNT OF WATER. (1)

HAZEL SHOWS DECENTRATION AND CAN LINK TWO OR MORE FEATURES OF AN OBJECT. SHE UNDERSTANDS THAT THE VOLUME OF AN OBJECT IS A COMBINATION OF LENGTH, WIDTH AND HEIGHT.

OR HAZEL UNDERSTANDS REVERSIBILITY. SHE CAN REVERSE THE PROCESS AND REALIZES THAT WATER IN GLASS ONE PREVIOUSLY CAME FROM A GLASS THAT WAS EXACTLY THE SAME AS GLASS TWO.

(c) Name the researcher who criticized the conservation task used by Piaget and explain the criticisms given by this researcher. (3 marks)

Name of researcher: SEIGAL (1)

Explanation of criticism:

ANY TWO OF THE FOLLOWING POINTS: (BUT NOT LIMITED TO THE GIVEN)

- THE WAY THE QUESTIONS WERE ASKED BREAKS CHILDREN'S CONVERSATIONAL RULES
- CHILDREN INTERPRET REPEATING A QUESTION USING SIMILAR WORDINGS AS - A WRONG ANSWER WAS GIVEN SO THEY CHANGE THEIR ANSWER WHEN THE SECOND QUESTION IS ASKED.
- CHANGING THE PATTERN OF QUESTIONING TO ASKING ONLY ONE QUESTION AFTER A TRANSFORMATION LED TO MORE PRE-OPERATIONAL CHILDREN GIVING CORRECT ANSWERS.

Question 8 (Continued)

- (c) Kohlberg's theory of moral development described the changes in moral reasoning as one progresses through different stages of development. Describe **one** feature of moral reasoning that corresponds to each of the following stages. (4 marks)

Stage of Moral Development	Description of moral reasoning
Punishment orientation	CHOICE OF RIGHT AND WRONG IS BASED ON A FEAR OF PUNISHMENT. IF A DEED GETS PUNISHED THEN IT MUST BE WRONG, IF IT DOES NOT – THEN IT IS RIGHT. (1)
Naïve reward orientation	CHOICE OF RIGHT AND WRONG IS BASED ON PERSONAL GAIN. ACTIONS THAT ARE REWARDED ARE CONSIDERED RIGHT WHILE ACTIONS THAT GET REPRIMANDED OR IGNORED ARE CONSIDERED WRONG. (1)
Good Boy/Good girl orientation	CHOICE OF RIGHT AND WRONG IS BASED ON WHETHER IT IS ACCEPTED BY CLOSE OTHERS (FAMILY & PEERS). ACTIONS ARE CONSIDERED RIGHT IF IT GAINS MEMBERSHIP AND ACCEPTANCE WITHIN THE FAMILY OR PEER GROUP. (1)
Authority orientation	CHOICE OF RIGHT AND WRONG IS BASED ON FOLLOWING RULES BECAUSE IT LEADS TO SOCIAL ORDER. RULES ARE REGARDED AS INFLEXIBLE AND HAVING ABSOLUTE AUTHORITY. ACTIONS ARE CONSIDERED RIGHT IF THEY FOLLOW RULES AND MAINTAIN ORDER (1)

- (d) What was Carol Gilligan's criticism of Kohlberg's theory of moral development? Outline her interpretation of moral development. (3marks)

STATES GILLIGAN'S CRITICISM (1 MARK)

- KOHLBERG'S THEORY WAS BIASED TOWARDS THE MALE REASONING THAT IS BASED ON A MORALITY OF JUSTICE (1)

OUTLINES GILLIGAN'S INTERPRETATION OF MORAL DEVELOPMENT (2 MARKS)

ANY TWO OF THE FOLLOWING POINTS:

- FEMALE MORALITY IS NOT LESS DEVELOPED THAN MALE MORALITY – IT TAKES ON A DIFFERENT PERSPECTIVE (1)
- FEMALES ARE PREDISPOSED BY SOCIETY AND NATURE TO TAKE ON A MORALITY OF CARE DUE TO ASSIGNED NURTURING ROLES (1)
- FEMALE MORAL DEVELOPMENT IS BASED ON UNDERSTANDING OF SELF AND SELF NEEDS (1)
- FEMALE MORAL DEVELOPMENT OCCURS IN 3 LEVELS : LEVEL 1 – SELF-SERVING BIAS, LEVEL 2 – SELF-SACRIFICE, LEVEL 3 – CARE AS A UNIVERSAL OBLIGATION

SECTION THREE: EXTENDED RESPONSE (50 marks)

This section has **TWO (2)** questions. You must answer **BOTH** questions.

Pages are included at the end of the two questions for planning and writing your answers.

- Planning: If you use a page for planning, indicate this clearly at the top of the page.
- Answering the question: In the pages provided indicate clearly the question number you are answering.

Suggested working time: 60 minutes

Question 9 (25 marks)

Angie overheard her parents talking about how her brother's ADHD medicine was making him less hungry. Because Angie was worried about her weight, she started sneaking one of her brother's pills every few days.

Todd found an old bottle of painkillers that had been left over from his dad's operation. He decided to try them. Because a doctor had prescribed the pills, Todd figured that meant they'd be OK to try.

Excerpt from "Prescription Drug Abuse" www.kidshealth.org

Apply your psychological understandings of the neural transmission process to describe the effect of prescription drugs on the nervous system.

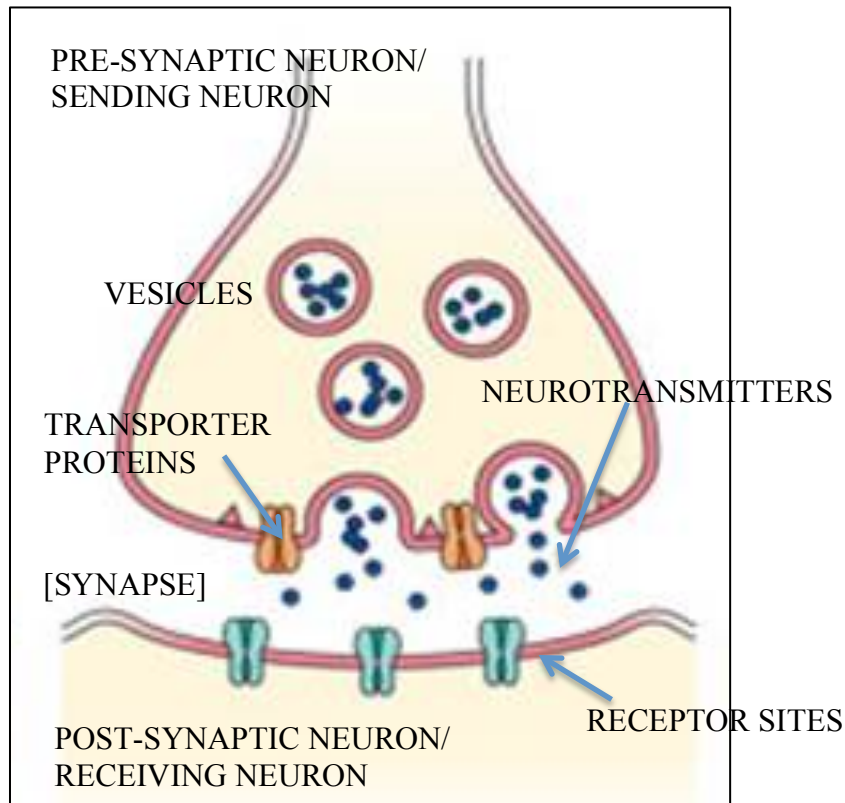

In constructing your extended response, you should:

- label the parts of the diagram provided
- describe the neural transmission process with reference to the diagram you have labeled
- discuss how dopamine and serotonin in the nervous system affect one's thoughts, feelings and behavior
- explain the effect of a prescription drug on the nervous system (choose **one** from any of the psychoactive drug groups – stimulants, antidepressants, depressants)
- discuss the short and long term impact of abusing prescription drugs on the individual.

Question No. 9

MARK ALLOCATION FOR EXTENDED RESPONSE

Using the terms given below, label the figure on the right. (1/2 mark for each correct label)

MARK FOR LABELS: _____ / 3.5 marks

- Description of Neural transmission Process (1/2 mark for each step): _____ / 4.5 marks

- _____ As action potential travels down the axon of the pre-synaptic/sending neuron, vesicles move towards axon terminals
- _____ Vesicles release neurotransmitters into the synapse.
- _____ Neurotransmitters attach to receptor sites on (dendrites of) receiving neuron/post-synaptic neuron.
- _____ An action potential is initiated in the receiving/post-synaptic neuron.
- _____ Neurotransmitters are released back into the synapse where some are degraded by enzymes.
- _____ Other neurotransmitters are re-absorbed by transporter proteins (re-uptake).
- _____ Re-absorbed neurotransmitters are repackaged back into vesicles.
- _____ Repacked neurotransmitters are reused when another action potential is generated.

Question No. 9 (continued)

Description of Response	Mark Earned
- Discuss how dopamine and serotonin in the nervous system affect one's thoughts, feelings and behaviour Discussion on dopamine (3 marks) - Dopamine is produced in the pleasure/reward centres of the brain when one feels good about oneself (1) - Effect on thoughts and feelings – motivated, confident, high self-esteem (1) - Effect on behaviour – repetition of behaviour / persistence in doing the task to keep getting feelings of pleasure (1) Discussion on serotonin (<u>Elaborates</u> on any 3 of the following points for 3 marks) - High levels of serotonin in the brain improves mood, makes one feel happy, optimistic, feel good about oneself (1) - High levels of serotonin improves attention/memory/learning (1) - Serotonin regulates appetite (1) - Serotonin regulates biological rhythm/ sleep-wake cycle (1)	(6 marks)
- Explain the effect of any ONE of the following prescription drugs on the nervous system - Stimulants (1) attach to transport proteins that re-uptake dopamine (1) dopamine stays longer in the synapse prolonging activation of receiving neuron (1) patient feels better / is less anxious or depressed - Antidepressants (SSRI) (1) antidepressants specifically attach to serotonin transport proteins preventing reuptake or deactivates enzymes that degrade serotonin in the synapse (1) serotonin stays longer in the synapse prolonging stimulation of receiving neuron (1) patient feels more focused, alert, memory improves - Depressants (1) depressants increase GABA levels in the brain (1) GABA inhibits activity of the nervous system (1) patient loses awareness of surroundings, feels sluggish/sleepy, lack of control of voluntary movements	(3 marks)
- Discuss the short and long term impact of abusing prescription drugs on the individual - states how prescription drugs are abused by referring to examples quoted in excerpt (1) - describes short term effect of prescription drug abuse (1) states how desired effect is obtained with early doses (1) person is encouraged to repeat taking the drug - describes long term effect of prescription drug abuse (1) tolerance to the drug increases and individual needs higher doses to get desired effects (1) individual develops an addiction / becomes dependent on the drug	(5 marks)
Communication Skills - Well-organized paragraphs with logical flow of ideas and correct use of psychological terminology (1-2 marks) - Correct sentence structure, grammar and spelling (1 mark)	(3 marks)
TOTAL MARKS EARNED	

Question 10 (25 marks)

“ Young people, between the ages of 15 and 25, are more likely to engage in negative behaviour when in a group than when on their own.”

Discuss the given statement using specific psychological evidence to explain factors that contribute to the tendency of groups to engage in bad behaviour.

Description of Mark Allocation	Mark Earned
• Provide an overview of how groups can influence individual behaviour (4 marks) ○ Describes how groups can have a positive influence (For 2 marks – gives at least <u>two</u> of the following sample responses but not limited to the given) (1) membership in a group fulfils the need to belong/ gives one a sense of belonging (1) membership in a group fosters one's social identity by giving support for ideas, reaffirming one's beliefs and values (1) cooperation within groups increases group efficiency (1) brainstorming by a group generates new ideas and new ways to solve problems ○ Describes how groups can have a negative influence For 2 marks – gives at least <u>two</u> of the following sample responses but not limited to the given) (1) strong group identification with in-group members leads to feelings of hostility towards out-group members (1) groupings can lead to labelling, promotion of stereotypes, prejudice towards out-group members (1) being part of a group leads to diffusion of responsibility for one's actions because accountability for the act and its consequences is shared with other group members (1) one loses one's individuality when in a group leading to feelings of anonymity and lack of accountability for the group's actions because one cannot be identified	(4 marks)
• Discuss how <i>deindividuation</i>, <i>competition</i> and <i>social loafing</i> contribute to negative group behaviour. (15 marks) ○ Contribution of Deindividuation to negative group behaviour (5 marks) (1) gives a psychological definition of deindividuation (1) states at least two factors that contribute to deindividuation (1-3) provides psychological evidence to explain how factors that contribute to deindividuation contribute to negative group behaviour - names researcher/experiment, its aim & participants - describes procedure or how data was collected - states results and how identified factor/s contributed to deindividuation ○ Contribution of Competition to negative group behaviour (5 marks) (1) gives a psychological definition of competition (1) describes group behaviour as a result of competition (1-3) describes a psychological theory of conflict to explain how competition contributes to negative group behaviour - names researcher/experiment, its aim & participants - describes procedure or how data was collected - states results and how the given theory of conflict explains negative behaviour	(3 x 5 marks)

Question no. 10 (continued)

Description of Mark Allocation	Mark Earned
○ Contribution of Social Loafing to negative group behaviour (5 marks) (1) gives a psychological definition of social loafing (1-2) provides psychological evidence to explain why social loafing occurs - names researcher & describes how data was collected - states results and explains why social loafing occurred (1) describes impact of social loafing on group efficiency and (1) how it can be minimized	
• Conclusion & Evaluation of Statement (3 marks) ○ Provides an evaluation of the statement (1) ○ Summarizes the psychological evidence that support the given evaluation (2) OR Gives anecdotal evidence / personal accounts to support evaluation (1)	(3 marks)
• COMMUNICATION SKILLS (1) logical flow of ideas and good organization of paragraphs (1) correct use & application of psychological terms (1) good sentence structure, correct grammar & spelling	(3 marks)
TOTAL MARKS EARNED	

END OF EXAM PAPER
