WORKSHEET

Converting degrees and radians

Every job is a …

Jessica Guidobond

Rules

To convert x degrees into radians:

$$x^\circ = x \times \frac{\pi}{180^\circ} \text{ radians}$$

To convert x radians into degrees:

$$x \text{ radians} = x \times \frac{180^\circ}{\pi}$$

Questions

Convert the following degrees into radians.

1 60°

2 45°

3 30°

4 90°

5 180°

6 120°

7 150°

8 100°

9 144°

10 75°

Convert the following radians into degrees.

11 $\frac{\pi}{10}$

12 $\frac{\pi}{3}$

13 $\frac{\pi}{5}$

14 $\frac{\pi}{9}$

15 $\frac{2\pi}{3}$

16 $\frac{3\pi}{4}$

17 $\frac{7\pi}{10}$

18 $\frac{5\pi}{6}$

19 $\frac{3\pi}{5}$

20 $\frac{7\pi}{18}$

Solutions

A 120°

C $\frac{2\pi}{3}$

D $\frac{5\pi}{6}$

E 150°

F $\frac{\pi}{3}$

G $\frac{\pi}{4}$

H $\frac{5\pi}{9}$

I $\frac{5\pi}{12}$

K 126°

L 18°

N $\frac{\pi}{6}$

O 135°

P 70°

R 108°

S 20°

T $\frac{\pi}{2}$

U 36°

W 60°

X $\frac{4\pi}{5}$

Y π
