WORKSHEET

More rates

1 Sam rode his bike at an average speed of 60 km/h.

a At this speed, how many metres does he travel in one hour?

b How many seconds are in one hour?

c How many metres did Sam ride in one second? Answer to one decimal place.

d Express Sam's average speed in metres/second.

2 Express each speed in metres/second, correct to one decimal place.

a 50 km/h _____

b 110 km/h _____

c 90 km/h _____

3 A leaking tap is dripping water at a rate of 20 mL/minute.

a How many millilitres of water does the trap drip during a 24-hour day?

b Calculate the rate the tap is dripping water in litres/day.

4 Billy is trying to decide between two irrigation systems.

- David pump system: delivers 650 L per hour
- Aquasmart system: delivers 200 mL per second.

a How many litres does the Aquasmart system deliver in an hour?

b Which system delivers the greater amount of water?

5 Convert a spray rate of 75 mL/s to a rate in:

a millilitres per minute _____

b litres per hour _____
