WORKSHEET

Chapter 8: Histograms

The shoe sizes of a group of Year 11 students were recorded below:

11	9	6	7	12	8	8	13	5	10	7	13	10
9	6	8	9	11	9	12	9	12	7	11	9	7
11	9	13	11									

1 Draw up a frequency distribution table to represent the data.

2 Display the data using a histogram.

3 What was the most common shoe size?

4 Five students wore what size shoe?

5 How many students had a shoe size of at least 10?

The numbers of sick days taken during the year by office staff were recorded below:

1	4	0	1	0	2	7	5	3	0	8	2	1
3	4	0	1	0	2	7	3	0	2	2	5	4
2	11	3	2									

6 Draw up a frequency distribution table to represent the data.

7 Display the data using a histogram.

8 How many staff had 4 sick days?

9 What was the most common number of sick days taken?

10 How many staff took fewer than 3 sick days?

A group of 10-year-olds ran 100 m. The times they took, in seconds, are recorded below:

13	16	14	17	13	15	12	15	14	16	15	19	18
13	14	16	15	14	13	17	14	16	15	12	17	18
15	13	14	15									

11 Draw up a frequency distribution table to represent the data.

12 Display the data using a histogram.

13 What was the most common time taken for the students to run 100 m?

14 How many students took 13 s to run 100 m?

15 How many students took more than 15 s to run 100 m?
