

Name: _____ Class: _____

Microscope Worksheet

Use the words from this word list to identify the parts of the microscope. When you can identify a part of the microscope place the matching word on the line which points to that part of the microscope.

Arm	Ocular Lens	Power Switch
Objective lenses	Base	Revolving Nose Piece
Course focus Knob	Fine Focus Knob	Diaphram
Projection Lens	Stage	Stage Clips

Microscope Study Guide

Here is a microscope with the major parts named. You may use this page to help you familiarize yourself with the parts of the microscope.

Here are the parts of the microscopes labeled and named for you. Keep this page to learn the parts of the microscope.

Adjustment mechanisms (Course Focus/Fine Focus) - an apparatus that moves the optic tube up and down to focus on the specimen

Arm - portion of microscope that connects the body to the base

Base - a stable bottom for the microscope to stand upright (not labeled)

Diaphragm - Allows light to settle onto slide

Ocular Lens or Eyepiece - lenses at the viewing end of a microscope or telescope

Lenses or Objective - lens at the end of a microscope nearest the object

Stage - a platform on top of the base of the microscope on which specimen are placed

Stage Clip - clips on top of stage that allow you to secure the speciman or slide.

Revolving Nosepiece - a portion of the microscope that allows you to switch back and forth between lens powers.

Power Switch - on/off button that powers the light.

Projection Lens - the source of light used.
