
Student name:

Subject: Physics

T1-T2-T3-T4

Teacher name:

Topic:
Waves

Date of assessment:

Student name:

A mechanical system resonates when it is driven at one of its natural frequencies of oscillation; energy is transferred efficiently into systems under these conditions

9

The intensity of a wave decreases in an inverse square relationship with distance from a point source

☐

This includes applying the relationship

$$I \propto \frac{1}{r^2}$$

9

☐
