INTRODUCTION

Instant Lessons PowerPoint slide presentations have been designed to assist teachers in presenting essential geography curriculum to junior and middle secondary school students. Physical, environmental, social and political geography themes are included throughout the series.

The enclosed CD-ROM contains:

- 5 PowerPoint slide presentations
- this book, in PDF format
- the activity sheets in this book, as editable word documents.

Key features and uses:

- Each topic is explored through a core set of slides.
- Teachers can tailor-make their own slide presentations by adding, deleting or altering slides.
- Carefully chosen diagrams, maps, graphs, illustrations and photographs illustrate the concepts being taught.
- On-screen activities test and extend student comprehension.
- Slide notes are provided as a 'map' for the content of each slide.
- Teacher's notes are provided in this book for each topic.
- Student worksheets have been designed so that they can be used during the presentation or later in the classroom, or as homework, extension, assessment or revision. They can be accessed on the CD-ROM in PDF and Word formats, or photocopied from this book.

Contents

<i>PowerPoint User Guide</i>	<i>4</i>
<i>Teacher's notes</i>	<i>6</i>
<i>Measuring Development and International Aid activity sheets</i>	<i>8</i>
<i>Refugees and Migration activity sheets</i>	<i>11</i>
<i>International Tourism activity sheets</i>	<i>14</i>
<i>Australia: People and Production activity sheets</i>	<i>17</i>
<i>Australia: Defence and Trade activity sheets</i>	<i>20</i>
<i>Selected answers</i>	<i>23</i>

It is recommended that teachers preview the slide sets before showing them to their class, to become familiar with the format and features.

Read the Teacher's notes for an overview of each topic, including key terms and concepts.

The PowerPoint presentations

Starting a slideshow presentation

The Slide Show is used to display the presentation on the screen. It is recommended that you use an external projector for whole-class use.

There are a number of ways to begin a Slide Show presentation. In the Windows environment, the CD-ROM will autorun. From the Main menu, simply click on the presentation you wish to view.

In the Macintosh environment, double-click the file index.pps. From the Main menu, click on the presentation you wish to view.

You can also open each presentation from within the PowerPoint application.

Navigating

Main menu

- ◆ From the Main menu, click Close to quit.
- ◆ During the presentations, click Close in the top right corner at any time to return to the Main menu.

Navigating use the mouse

- ◆ Click – Moves presentation to the next slide.

Moving forward

- ◆ Press the N key.
- ◆ Press the Spacebar or Enter key.
- ◆ Press the Page Down key.
- ◆ Press the Right Arrow key.

Moving backward

- ◆ Press the P key.
- ◆ Press the Backspace key.
- ◆ Press the Page Up key.
- ◆ Press the Left Arrow key.

Navigating using the slide show toolbar

At the bottom left corner of the slide show, a toolbar is displayed. There are three buttons that deal with navigation.

- ◆ Left Arrow button – Moves presentation back to the previous slide.
- ◆ Right Arrow button – Moves the presentation to the next slide
- ◆ Slide Icon button – Provides a pop-up menu with Next and Previous menu items, as well as a Go to Slide item that allows for navigation to a specific slide.
- ◆ Right-Click – Provides a pop-up menu with Next and Previous menu items, as well as a Go to Slide item that allows for navigation to a specific slide.

Navigating to a specific slide

There are a number of different ways to display a specific slide.

- ◆ Slide Number + Enter – While in the Slide Show mode, type in the slide number to be displayed and press Enter.
- ◆ Control-S – To display a menu of all slides in the presentation, press Control and S keys. A menu will appear. Select the desired slide from the menu and press Enter.
- ◆ Slide Icon Button – Choose the Slide Icon button from the Slide Show Toolbar. Choose Go to Slide, then choose the desired slide.
- ◆ Right-Click – Choose Go to Slide, then choose the desired slide.

Blanking out the screen

To present a blank screen while in the Slide Show mode:

- ◆ Slide Icon Button – Choose the Slide Icon button from the Slide Show Toolbar. Choose Screen menu item. Select Black Screen or White Screen.
- ◆ Right-Click – Choose Screen menu item. Select Black Screen or White Screen.

Speaker notes

Speaker notes are included for each slide to provide a summary of the content of that slide. In Normal view, these notes appear at the bottom of each slide.

Speaker notes can be displayed during a slide show presentation. However, when displayed they will be visible to the audience. If you do not want students to see the speaker notes, but need to access them, print the notes before class from the Word document on the CD-ROM.

To view speaker notes during a slide show presentation:

- ◆ Right-click, choose Screen | Speaker Notes to see the notes for this slide.

Pointer / pen

The Pointer and Pen tools can be used in the Slide Show view to highlight or draw on the screen, much as would be done on a whiteboard. Drawings can be saved with the presentation or discarded.

Note that while using Pointer tools during a Slide Show, you will not be able to click the mouse to move to the next slide. Instead, use one of the alternative navigations provided on the previous page, such as the Right Arrow key.

To activate the Pointer tools:

1 In Slide Show view, right-click, choose Screen | Pointer Options (or click on the Pen icon in the Slide Show Toolbar) and choose one of the following.

- ◆ Arrow – provides an arrow on the screen.
- ◆ Ballpoint Pen – used to write notes on the screen.
- ◆ Felt Tip Pen – a wider pointed pen, useful for drawing. (Windows Office 2003 or higher only)
- ◆ Highlighter – used to apply a highlight of color that is transparent. (Windows Office 2003 or higher only)
- ◆ Ink Color – Choose the color to be used with the tool.
- ◆ Eraser – used to erase entries. (Windows Office 2003 or higher only)
- ◆ Erase All Ink on Slide – Removes all entries from the screen. (Windows Office 2003 or higher only)

2 Use the mouse to draw or write on the screen.

Ending a presentation

Each of these actions will end the presentation:

- ◆ Click Close in the top right corner.
- ◆ Press the Esc key.
- ◆ Right-click and choose End Show.
- ◆ Choose the Slide Icon button in the Slide Show Toolbar & select End Show.

Technical specifications Windows

The CD-ROM will autorun in the Windows environment.

To view the presentations – Windows 97 or later operating system

To edit a presentation, open it from within the PowerPoint application.

Note that if editing these PowerPoint presentations in a version prior to Office 2000, cosmetic losses will occur in some animations, and visual effects such as drop shadows may be lost. These losses are cosmetic only, and will not affect the clarity and content of the slide show.

Macintosh

Double-click the file index.pps on the CD-ROM. From the Main menu, click on the presentation you wish to view.

You can also open each presentation from within the PowerPoint application.

To view a fully featured presentation, and edit it, you must have the PowerPoint 2004 application installed. (i.e. Office 2004 for Macintosh or later)

To edit a presentation, open it from within the PowerPoint application. Note that if editing these PowerPoint presentations in a Macintosh environment, cosmetic losses will occur in some animations, and visual effects such as drop shadows may be lost. These losses are cosmetic only, and will not affect the clarity and content of the slide show.

Teacher's notes on the CD-ROM

To open these files you need:

- ◆ **PDF file** – Adobe Acrobat Reader version 6, or higher.
- ◆ **Word document** – Microsoft Office 2000, or higher.

TOPIC 1: Measuring Development and International Aid

These slides examine the kinds of quantitative data and indicators that are used to measure development. The data and indicators are used by countries such as Australia to determine where and when to offer aid to other governments and people in need. Different types of aid are described and students are asked to consider how the aid needs of people in our region are being met.

Key terms: Quantitative comparisons, Human Development Index, Human Poverty Index, Gross Domestic Product per capita

Concepts explored: Measuring differences in wealth; developed and developing countries; life expectancy; standard of living; causes in decline in HDI; which countries are wealthiest; country rankings by HDI; measuring development; other indicators of development – literacy rates, life expectancy, child and maternal mortality; aid within Australia, different types of international aid; non-government aid organisations; amounts of aid from different nations; who receives Australian aid; the appropriateness of aid

Examples used: World statistics about aid, poverty and human development

Extension slide set: Australia’s international aid – countries that receive Australian aid and the reasons for providing aid. Students are given a quotation from a Cambodian woman that extends upon the adage ‘give a man a fish and you feed him for a day, teach a man to fish and you feed him for a lifetime’. The quotation suggests that the man is just as likely to be a woman and her livelihood, human rights and health are affected by factors such as pollution, poachers and corruption. Students are encouraged to consider the appropriateness of aid.

.....

TOPIC 2: Refugees and Migration

This set of slides focuses on some reasons why people are forced to leave their homes, as well as factors that encourage people to move freely from one country to another to live. Students examine the various types of forced migrants and where they are located in the world. They will also look at where migrants to Australia come from and how migration has changed the ethnic diversity of the nation.

Key terms: Refugee, asylum seeker, displaced person, person of concern, emigration and migration, multiculturalism

Concepts explored: Persons of concern to the UNHCR – refugees, asylum seekers and displaced persons; how many people there are of concern in the world; parts of the world where persons of concern are located; reasons why people leave their homes; Australia and migration; where Australian migrants come from; push and pull factors; migration eligibility criteria – family, skilled and humanitarian; multicultural Australia; the movement of people; the Geneva Convention

Examples used: United Nations data about the number of people of concern, Australian data showing sources of migrants and eligibility categories

Extension slide sets: Migration, refugee, asylum seeker and displaced persons knowledge quiz. Students answer a range of true or false and multiple-choice questions that will test their understanding of the key themes of this topic.

.....

TOPIC 3: International Tourism

This slide set introduces students to the extent of tourism worldwide and to the major trends in tourism in Australia. Students will also consider the impacts tourism has on countries and communities.

Key terms: Tourism, revenue, natural and constructed attractions, infrastructure

Concepts explored: Definition of tourism; tourism as a source of revenue; numbers of tourists worldwide; top 10 world tourist destination countries; natural and constructed attractions; international tourism to Australia; benefits of tourism to the economy, goodwill and local infrastructure; trends in tourism data; why visitors came to Australia data; attractions in Australia; impact of global tourism

Examples used: Australian and overseas data about travel destinations and numbers of tourists, World Tourism Organisation

Extension slide sets: Students look at data that shows the reasons besides holidaying that people come to Australia. They are also required to identify the location of attractions and classify them according to 'human' or 'natural'. Finally, students are encouraged to look at the positive and negative impacts of global tourism based on environmental, social, economic and political parameters.

.....

TOPIC 4: Australia: People and Production

These slides introduce industry sectors that contribute to Australia's gross domestic product and employment – agriculture, retail manufacturing and services. The focus is on finding out where these activities occur, especially in rural and regional areas. The wine industry and its contribution to the economy are also explored.

Key terms: Urban and rural Australia, industry sectors – agriculture, manufacturing, retail

Concepts explored: Where most Australians live; capital city populations; major regional towns and cities; employment sectors and industries; changes in sectors as seen in employment figures; regional production locations; industrial and agricultural production; geographic distribution of manufacturing centres; key centres and their locations; the Australian wine industry – growth of the industry, contribution to the economy and key statistics

Examples used: Australian cities and regional towns such as Burnie, Newcastle, Weipa, Mt Isa and Geelong. Australian GDP and industry, agriculture and employment data

Extension slide sets: The Australian wine industry. These slides introduce key statistics about this growth industry. Students are asked to create a map showing grape-growing and wine-making regions. Access to research materials and an atlas would be helpful for completing the activities.

.....

TOPIC 5: Australia: Defence and Trade

These slides introduce the main roles that Australia's defence forces play in regional and world relations, and provide detail about the major operations they are currently involved in. The trade slides explore who Australia's key import and export partners are, as well as the materials and products that are traded.

Key terms: Defence force operations, trade, imports and exports, surpluses and deficits, industries

Concepts explored: The roles of the Australian defence forces – peace-keeping, protection of embassies and consulates, national security and specialist services; where the defence forces are deployed and key operations; links between defence, national security and global social responsibility; three levels of trade; major imports and exports; main trading partners; trade surpluses and deficits; composition of Australian trade; trade and defence quiz

Examples used: World locations and defence operations including East Timor, the Solomon Islands, Iraq, Afghanistan and the Middle East. Trade data and statistics about merchandise imports and exports, trade surpluses and deficits and the types of materials traded by Australia.

Extension slide sets: Trade and defence quiz. This true and false quiz requires students to rewrite false answers, and it is based on information presented in the main slide presentation. The quiz could be conducted at the end of the slide presentation or given for homework.

Measuring differences in wealth

Some countries are rich and others are poor, and some fit in between. To help make quantitative comparisons, the United Nations (UN) started using the Human Development Index (HDI) in 1975.

- 1 What does 'quantitative' mean?_____
- 2 Why are quantitative comparisons useful for studying rich and poor countries?_____

The UN also uses a Human Poverty Index (HPI) – one for developing countries and a different one for developed countries.

- 3 Suggest why there are different HPIs for developed and developing countries._____
- 4 Complete this sentence: The elements used to quantify HDI and HPI measurements are l_____ (life expectancy), k_____ and s_____ of l_____.

- 5 Suggest in point form how each of these elements is relevant to the wealth of a country.

- 6 Draw lines to complete the definitions.
 - a Quantitative
 - is a quantitative measure.
 - b The Human Development Index (HDI)
 - is one with much lower living conditions than a developed country.
 - data is numeric data.
 - c Gross Domestic Product (GDP) per capita
 - is the amount of money a person earns on average in a specific country.
 - d An index
 - is a measure of average achievements in three basic areas – life expectancy, knowledge and standard of living.
 - e A developing country
 - has good living conditions for most of the people.
 - f A developed country

- 7 For each of these factors, provide an example to explain how it could cause a decline in the HDI of a country.
 - a Reduced health and educational services due to economic circumstances

 - b Political interference_____
 - c War_____
 - d Disease_____
 - e Natural disasters_____

Here are some countries that are numbered according to their 2006 HDI rankings.

1 Norway	5 Sweden	18 United Kingdom	109 Vietnam
2 Iceland	6 Canada	20 New Zealand	126 India
3 Australia	7 Japan	50 Cuba	139 Papua New Guinea
4 Ireland	8 United States	61 Malaysia	177 Niger

source: www.hdr.undp.org

- 8 Which country in this list is the wealthiest?_____
- 9 Which country in this list is the poorest?_____

MEASURING DEVELOPMENT AND INTERNATIONAL AID 2

10 What generalisations can you make from these HDI rankings?

11 The United States is sometimes called the most powerful nation in the world, yet their ranking is only 8, not 1. Suggest reasons why.

12 Based on the HDI, Australia's ranking is 3. However, based only on GDP per capita, Australia's ranking is 12. Suggest reasons for this difference in ranking.

13 Which measure – HDI or GDP per capita – do you think is a more accurate measure of wealth? Why?

HDI, HPI and GDP per person are three ways of measuring a country's development. Other measures can also be used.

14 Write each term beside the correct definition: *adult literacy rates, life expectancy, GDP, under five mortality, maternal mortality ratio.*

a The percentage of adults who can read and write_____

b The average number of years a person born at a particular time is expected to live

c The total value of goods and services produced in a country in one year

d The probability of dying between birth and five years of age, expressed per 1000 live births

e The annual number of deaths of women from pregnancy-related causes, per 1000 live births

15 Explain, using examples, how each indicator in the previous question relates to the wealth of a country.

16 Provide examples of the types of aid that are available in Australia, and identify who provides this aid.

When international aid is provided to people in the developing world, it takes different forms. Sometimes conditions are placed on how aid is to be used.

17 Suggest reasons why conditions are imposed, and what you think these conditions might be.

Australia’s international aid

In 2007–8, some of the top recipient countries of Australian government aid were:

- Papua New Guinea – \$355.9 m
- Indonesia – \$179.1 m
- East Timor – \$72.8 m
- Cambodia – \$33 m
- Solomon Islands – \$95.4 m
- Vietnam – \$73.7 m
- Philippines – \$89.9 m
- China – \$30 m

1 Describe the spatial distribution of these countries in relation to Australia.

2 Suggest reasons why these countries are some of the top recipients of Australia’s aid.

People often say: ‘Give a man a fish and you feed him for a day, teach a man to fish and you feed him for a lifetime.’ The quote below is from Oxfam Community Aid Abroad’s Submission to the Human Rights Sub-Committee of the Joint Standing Committee on Foreign Affairs Defence and Trade ‘The link between aid and human rights’.

The sentiments of Thin, a woman leader from Check village, Takeo Province, Cambodia:

A man is just as likely to be a woman, and she already knows how to fish.
She would like her river left alone by illegal logging companies or fish poachers using dynamite and working in collusion with corrupt local government officials.
She would prefer that her government did not build huge dams with the help of the Asian Development Bank, dams that have reduced fish stocks dramatically and damaged her livelihood.
She would prefer that police did not use violence to enforce mass evictions to enable the dams to be built.
She doesn’t want charity.
She would like her basic rights respected.

International aid is complex – it is not simply a case of giving money to poorer countries and expecting their standards of living to start improving.

The challenge is to provide aid in appropriate, effective and culturally sensitive ways.

3 How can this be achieved?

4 Write about your concerns or beliefs about international aid, referring to the information above.

REFUGEES AND MIGRATION 1

Persons of concern

In 2005, there were approximately 20 million people worldwide who had been identified by the United Nations High Commissioner for Refugees as persons of concern.

1 Write the correct term beside each definition: *internally displaced person, asylum seeker, persons of concern, refugee, convention.*

a A person who is seeking refuge_____

b A person who has lost their home but remains inside their country_____

c Stateless and war-affected populations_____

d Someone who believes they are at risk of persecution_____

e An agreement_____

How many persons of concern are there?

This graph shows the estimated number of refugees and total persons of concern to UNHCR worldwide.

2 Why do you think there were no 'total persons of concern' figures before 1995?

3 Describe the trends shown in this graph.

True or false?

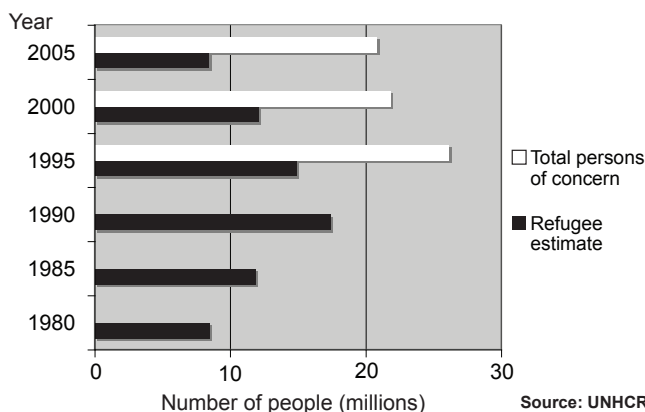

4 Decide if each statement is true or false, then correct the false statements so that they are true.

a A person who leaves a country voluntarily to seek a better life in a new country would be considered a refugee.

b In 2005, there were more than twice as many persons of concern as there were refugees.

c An internally displaced person is someone who has lost their home but remains inside their country.

Estimated number of refugees and total persons of concern, worldwide

d A person who has fled their country of origin because they were tortured for speaking out against their government would be considered a refugee.

e People who have fled political persecution but remain within their country are known as asylum seekers.

f The number of refugees worldwide has continuously increased since 1980.

Australia and migration

Each year, many people around the world move from one country to another – not because they are forced to, but because they choose to. The movement of people out of a country is known as emigration. Some people emigrate from Australia, but many more migrate here. Together, migrants have created huge economic and social change in this country.

5 From which countries that you know of have people migrated to Australia?

REFUGEES AND MIGRATION 2

6 During the 1970s, many migrants came from Vietnam. The war there had left many people displaced. Do you think Australia had an obligation to accept migrants from Vietnam after the war? Why?

There are many different reasons (push and pull factors) behind migration to this country.

7 What are push and pull factors?_____

8 List three examples each of push factors and pull factors.

This table shows the country of birth for selected settler arrivals to Australia in 1982–3 and 2004–5.

9 Complete the table by filling in the percentage columns.

10 a How many people came from countries other than those shown here?

b What countries do you think these might include?

Country	1982–3		2004–5	
	No.	%	No.	%
China	1 200		11 100	
India	1 700		9 400	
New Zealand	6 900		17 300	
South Africa	2 800		4 600	
United Kingdom	26 400		18 200	
Vietnam	8 700		2 200	
All settler arrivals	93 000		93 900	

11 Which parts of the world provide the most migrants to Australia?

Source: Australian Bureau of Statistics

12 Where are people increasingly coming from?_____

13 Given these trends, where do you think the majority of migrants will be coming from by 2015?

14 Use these words to complete the sentences: *employers, reunite, skilled, shortage, seekers, overseas, humanitarian, family, refugees, marries, parents.*

There are a number of categories of eligibility for migrants coming to Australia.

These categories include _____. For example, when someone from overseas _____ an Australian person, or when other relatives such as _____ are permitted to _____ with people living here.

_____ is another eligibility category. For example, when there is a _____ of workers with particular skills in this country and _____ cannot fill jobs, workers from _____ are recruited.

Another eligibility category is _____. For example, when _____ or asylum _____ successfully apply to migrate to Australia.

REFUGEES AND MIGRATION 3

Migration, refugees, asylum seekers and displaced persons – test your knowledge

- 1** Answer true or false to the following statements, then correct the false statements so that they are true.
- a** According to the UNHCR, stateless and war-affected populations are defined as persons of concern.

- b** Asylum seekers are people driven out of their countries by natural disasters. _____
- c** The continent with the greatest number of refugees is Asia. _____
- d** Between 1996–7 and 2004–5, Australia experienced a shift from the family migration eligibility category to the skilled migration eligibility category.

- e** In 2004–5, New Zealanders comprised the largest proportion of migrants to Australia. _____
- f** Better living conditions are a pull factor for migrants. _____

The Geneva Convention

The 1951 Geneva Convention relating to the status of refugees is the key legal document in defining a refugee. It outlines the rights and responsibilities of both the refugees and the states that are parties to the convention. By 2007, 194 states were parties to the Geneva Convention.

- 2** Is Australia a party to the Geneva Convention? _____
- 3** What is another word for ‘convention’ as it is used in this context? _____

Multiple-choice questions

- 4** The movement of people into a country is known as
- a** push factors.
 - b** pull factors.
 - c** immigration.
 - d** emigration.
- 6** The category of migrants that made up the largest proportion of Australia’s migration program in 2004–5 was
- a** family.
 - b** skilled.
 - c** humanitarian.
 - d** New Zealand.
- 5** In 2004–5 the largest number of migrants to Australia was from
- a** China.
 - b** India.
 - c** New Zealand.
 - d** the United Kingdom.
- 7** The eligibility category which experienced the largest percentage change in migrants to Australia between 1996–7 and 2004–5 was
- a** skilled.
 - b** humanitarian.
 - c** New Zealand.
 - d** family.

Multicultural Australia

- 8** What is multiculturalism? _____
- 9** In what ways do we see multiculturalism in Australian life? _____

- 10** What benefits does it bring to this country? _____

- 11** Some Australians believe that all migrants to Australia should be encouraged to embrace Australian values and integrate with Australian life. Multiculturalism, they say, has failed. What do you think?

INTERNATIONAL TOURISM 1

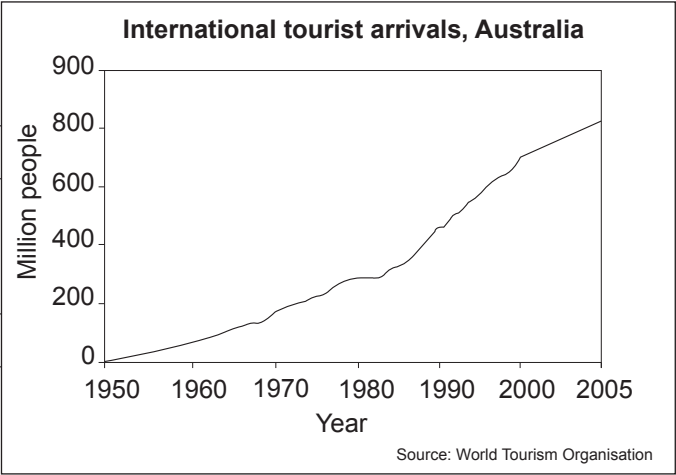

A vital global industry

- 1** Complete the sentences using these words: *revenue, employers, dramatically, purposes, year, environment, activities, business, industries, international*.
- Tourism is defined by the World Tourism Organisation (WTO), as the _____ of people who travel outside their usual _____ for no more than a _____, for leisure, _____ or other _____.
- The industry has grown _____ since 1950, and is now one of the world's _____ industries and _____.
- Nearly every country in the world actively encourages _____ tourists to visit – they are an important source of _____.
- 2** What is 'revenue'? _____
- 3** Why is it an advantage for countries to gain income from international tourists? _____

- Australia actively encourages international tourism from various parts of the world, including the USA, UK, Europe and Asia.
- 4** From your experience, which parts of Australia are popular tourism destinations? Which features attract tourists to these places? _____
- 5** Which parts of Australia would you like to visit as a tourist? Why? _____

Tourists on the move

- 6** What does this graph tell you? _____
- 7** Why has there been a rapid increase in international tourist arrivals since 1960? _____
- 8** Given the trends shown in the graph, what do you estimate this year's arrivals figure will be? _____

- The table on the next page shows the world's top 10 tourist destinations by the number of arrivals in 2005.
- 9** Which two continents figure prominently as popular international tourist destinations? _____
- 10** Suggest reasons for the popularity of the top 10 countries. Consider natural and constructed features. _____

INTERNATIONAL TOURISM 2

Top 10 tourist destinations by number of arrivals, 2005		
1	France	76.0 m
2	Spain	55.6 m
3	USA	49.4 m
4	China	46.8 m
5	Italy	36.5 m
6	UK	30.0 m
7	Mexico	21.9 m
8	Germany	21.5 m
9	Turkey	20.3 m
10	Austria	20.0 m
	WORLD	806.0 m

Source: WTO

11 Why do you think Australia is not on this list?

12 Which of these ten countries would you most like to visit? Why?

International tourism to Australia

13 Complete these sentences.

International tourism to Australia is a vital part of the _____.

Tourism impacts on a range of industries including _____, restaurants, transport and retail.

Australia is heavily _____ overseas as a tourism _____, particularly in the USA, parts of Asia, the UK and Europe. _____ and India in particular are seen as _____ markets.

In 2004–5, the tourism industry in Australia _____ 550 100 people.

In 2004–5, international tourists _____ around \$18.3 billion of goods and services while visiting Australia.

This represents about 12% of the total value of _____ goods and services from Australia during that _____.

Visitors who enjoy their stay in Australia help to _____ the country overseas.

Friendships are formed between Australians and overseas _____.

In return, Australians may increase their visits to overseas countries.

Local residents benefit from investing in tourism, which creates better _____ and _____ in their area.

14 What other benefits can you think of?

15 The terrorist bombing in the USA on 11 September 2001 brought about changes in international tourism. List four more factors (positive and/or negative) that could affect the number of international tourists, both in Australia and globally.

INTERNATIONAL TOURISM 3

Tourists in Australia

While holidaying is the single biggest reason for international tourists to come to Australia, there are other reasons.

This table shows the reasons why international visitors came to Australia in 2005.

- 1** What do you notice about the percentage total? Suggest reasons for this.

- 2** Complete the table by calculating the number of visitors who came for each purpose.

- 3** Tourists come to Australia to see natural and constructed attractions. Describe the location of each attraction in the table below, and identify it as constructed or natural.

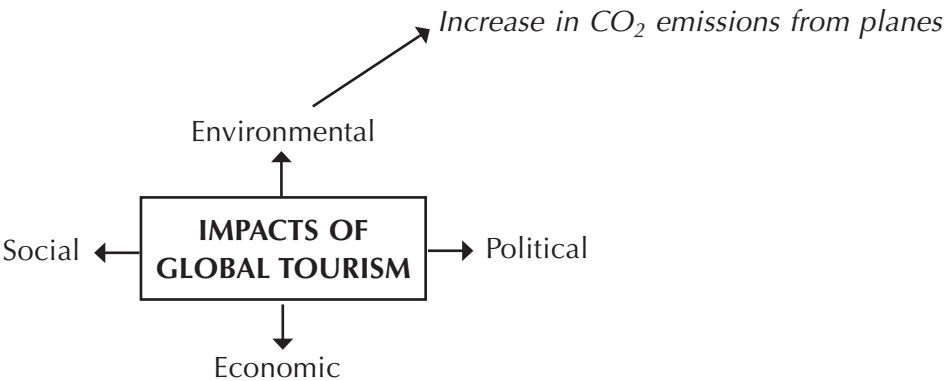

Reasons for tourist travel to Australia, 2005

Purpose	Visitors '000	%
Holiday		57
Visiting friends and relatives		22
Business		16
Education		4
Employment		2
Other		6
TOTAL	5020	107

Source: Australian Bureau of Statistics

Attraction	Location	Constructed or natural?
Airlie Beach		
Daintree National Park		
Uluru		
Fremantle restaurants		
Queen Victoria Market		
Wave Rock		
Opera House		
Barossa Valley wineries		
Port Arthur ruins		
Litchfield National Park		
Australian War Memorial		
Great Ocean Road		

- 4** Add as many positive and negative impacts of global tourism as you can to the chart below. Use colour to indicate positive or negative.

AUSTRALIA: PEOPLE AND PRODUCTION 1

Where do Australia’s people live?

1 Complete these sentences.

Australia is one of the world’s most _____ countries.

Nearly two-thirds of the _____ lives in _____ and territory capital _____.

Although it began its European _____ as an _____ society, Australia developed into an important agricultural _____ as settlement _____ both inland and along the _____.

Many smaller urban _____ in _____ and rural Australia are also home to more than a million Australians.

These are the non-capital _____. The largest one is the City of Gold Coast in _____ – Australia’s seventh _____ city.

Eighty per cent of Australia’s _____ lives on or near the coast.

2 Write each state or territory capital city beside the correct population figure.

- a 105 991 _____

b 200 525 _____

c 323 056 _____

d 1 105 839 _____

e 1 445 079 _____

f 1 763 131 _____

g 3 592 591 _____

h 4 119 190 _____

3 Use colour or lines to group each box of places with the correct state or territory.

a Belconnen,
Tuggeranong,
Weston Creek

b Broken Hill,
Coonabarabran,

Australia’s people – what do they do?

Australians work in a diversity of sectors and industries which make up the counry’s economy. Major sectors include retail, agriculture and manufacturing.

4 Provide five examples of each of these three major employers.

Retail
Agriculture
Manufacturing

AUSTRALIA: PEOPLE AND PRODUCTION 2

This graph shows the six largest industries in Australia, according to the number of people employed.

5 How did these numbers change between 1987 and 2005? Suggest reasons for these changes.

6 How do you think these numbers will change over the next 10 years?

7 For each clue in the table below, write the location or type of industry. Choose from: *wool industry, Newcastle, Weipa, manufacturing, tourism.*

Location or industry	Clue
	I am one of Australia's oldest industries. While once Australia was 'riding on its back', in recent years the industry has experienced decline. Australia, however, is still the world's largest producer, accounting for over one-quarter of world production.
	I am the second largest settlement in NSW, after Sydney. I am a river port which specialises in bulk cargo. My biggest export is coal.
	I am an isolated mining town, located 838 km north of Cairns. I was built for the purpose of mining bauxite, which is then shipped to an aluminium processing plant at Gladstone.
	Due to globalisation and trade liberalisation, I have experienced substantial decline in Australia in recent decades as I am no longer able to compete globally.
	I have experienced growth in recent decades and am a substantial contributor to Australia's exports and GDP. I was given a boost over the past 10 years by Australia's hosting of the Olympics, Rugby World Cup and Commonwealth Games.

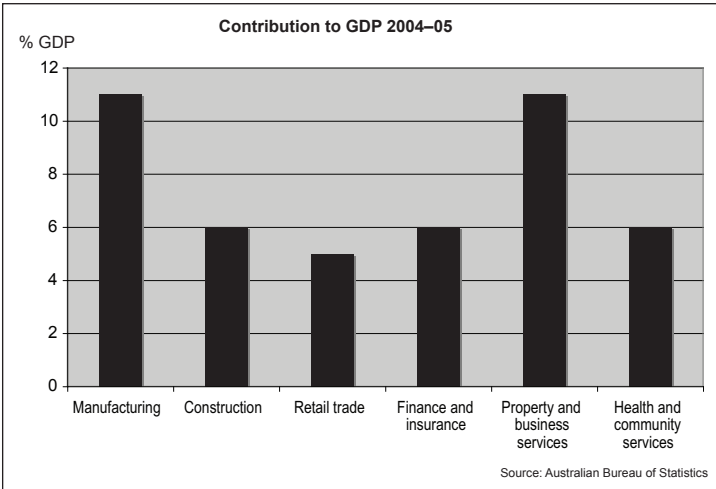

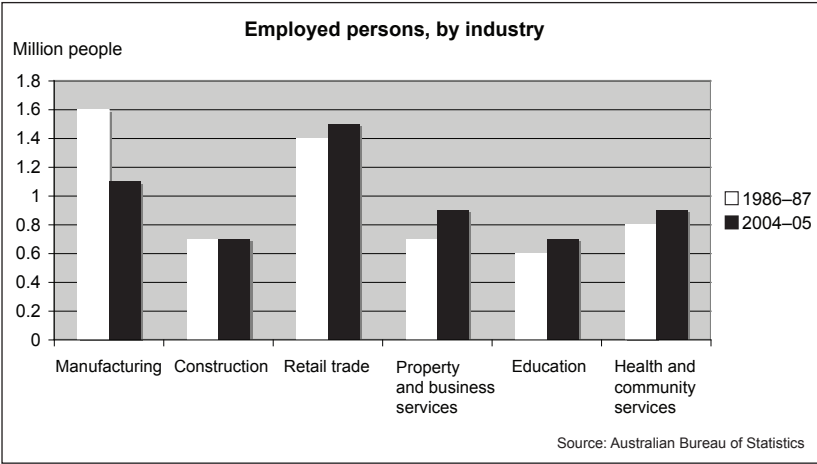

Industrial and agricultural production

Employment is one measure of the significance of sectors in Australia. Another is the measure of output, or total value of production in each sector.

This graph shows the six largest contributions to GDP of the sectors of the Australian economy in 2004–5, according to value of production.

8 Which two sectors were the most prominent in terms of their value of production?

9 Do you think the situation would be similar now, or have some changes occurred in the significance of various sectors to the economy? Investigate the changes by searching the Australian government sites and the Australian Bureau of Statistics Year Books.

AUSTRALIA: PEOPLE AND PRODUCTION 3

The Australian wine industry

The Australian wine industry has grown considerably over the past few decades. Today, Australian wines are exported to 80 countries around the world. In 2006, around 1.85 million tonnes of grapes were crushed by Australian wine-makers. In 2005–6, the Australian wine industry exported 722 million litres of wine, worth \$2.7 billion. Nearly two-thirds was red wine.

The top five overseas markets for Australian wine in 2005–6 were:

- UK (34%)
- USA (31%)
- Canada (9%)
- NZ (3%)
- Netherlands (2%)

A record volume of wine was also sold domestically in that year – 431 million litres.

Contribution to the economy

- 1** Use these words to complete the following sentences: *regional, exporter, employs, tourism*.

According to the Australian government, the wine industry:

- directly _____ 30 000 people in wine making and grape growing
- makes an important contribution to a number of _____ economies
- is a major _____ (50% of Australian wineries export)
- is a major contributor to _____.

True or false?

- 2** Identify the following statements as true or false. Then correct the false statements so that they are true.

a More Australian wine is sold in Australia than overseas.

b Apart from New Zealand, the largest importers of Australian wine are located in Europe and North America.

c The number of people directly employed by the Australian wine industry is estimated to be 20 000 to 25 000 people.

d A small minority of Australian wineries export their wines.

e In 2005–6, between one and two million tonnes of grapes were crushed to make Australian wines.

f Many Australian wineries help to bring tourists into regional areas.

3 a Use colour on this map to indicate the major grape-growing regions in Australia.

b Locate major towns and cities that are involved in the production of wine.

c Label the map correctly with a title and legend.

AUSTRALIA: DEFENCE AND TRADE 1

Australia's defence force operations

Australia's defence forces are active in various parts of the world. Members of the Australian army, air force and navy are currently deployed to carry out a range of roles, including peace-keeping, the protection of Australian embassies and consulates, national security and specialist services.

- 1 Australia is a relatively small country, in terms of population. Why do you think our defence forces are involved in global issues?
- 2 a Below is a list of operations that Australian defence forces are involved in around the world. Locate each place on a world map.

Middle East, Iraq – Operation Catalyst – Australia's contribution to the rehabilitation of Iraq	Middle East – Operation Slipper – Iraq and Afganistan
East Timor – Operation Citadel and Operation Spire	Solomon Islands – Operation Node
Middle East – Operation Paladin – Israel, Syria and Lebanon	Middle East – Operation Mazurka – Sinai Peninsula
Eritrea and Ethiopia – Operation Pomelo	Southern Ocean – Operation Mistral
Northern Australia and Sea Air Approaches – Operation Cranberry	Australian border protection – Operation Relex II

- b What geographic trends can you see?
- 3 Using the list above, identify the location of each defence force operation, described below.

Defence force operation description	Location
The purpose of this operation is to detect illegal activity off the north coast of Australia, such as smuggling and illegal fishing. It is primarily undertaken by the Royal Australian Navy Fremantle Class Patrol Boats and Army Reserve personnel.	
This is Australia's contribution to the Multinational Force and observers in an area of land near the border of Israel and Egypt. Twenty-five Australians assist in the peace process by monitoring the border and preparing daily operation briefings.	
Australia contributes two army officers to the UN mission in these two countries in the east of Africa. The mission includes monitoring the cessation of hostilities, troop deployments and a temporary security zone between the countries.	
Australia's contribution to the rehabilitation of this war-torn country has been in place since 2003.The focus is on stabilisation and recovery programs, and facilitating the transition to self-government.	
Australia has led a Regional Assistance Mission in this Pacific country. The contribution includes 450 Australian Defence Force personnel, Federal Police and Australian Protective Service staff.	
This operation works to detect, intercept and deter vessels carrying unauthorised arrivals from entering Australia through the north-west maritime approaches. It includes navy, air force and army personnel, supported by Coastwatch and Customs.	
During this operation, Australia contributed 25% of the UN peace-keeping force. The Australian commitment is continuing here with headquarters, logistics and engineering, and military liaison tasks.	
This is Australia's contribution to the UN Truce Supervision Organisation (UNSTO). It was established in 1948 to supervise the truce agreed at the conclusion of the first Arab–Israeli war.	

AUSTRALIA: DEFENCE AND TRADE 2

This operation is Australia’s contribution to the war against terrorism.

This operation provides support to the civil agencies enforcing Australian sovereign rights and fisheries laws in the oceans to the south of the continent.

- 4 Comment on the different purposes of Australia’s defence force operations.
- a Do you consider any particular operations to be more worthwhile than others?

- b Are all of these operations essential? Explain your answer.

- c Which of these operations relate to Australia’s national security?

- d Which of these operations relate to Australia’s global social responsibility?

Australia’s international trade

Trade is an essential regional and global link for Australia. Trade allows us to export products in which we have a competitive advantage, and import products which we are less efficient at producing.

- 5 In which areas of trade does Australia have a competitive advantage? What products do we export?

- 6 Which products is Australia less efficient at producing? What products do we import?

The Australian government pursues trade opportunities on three levels:

- 1. Multilateral (through its membership of the World Trade Organisation)
- 2. Regional (through its membership of regional organisations such as APEC)
- 3. Bilateral (through negotiation of specific free trade agreements with individual nations)

- 7 What does multilateral mean?_____

- 8 What does APEC stand for?_____

- 9 Name a free-trade agreement and the country or countries with which Australia signed it.

Composition of Australia’s trade

- 10 Complete the following sentences.

Australia is a major e _ p _ rt _ r of primary p _ o _ uc _ s – that is, products that are p _ odu _ ed on or from the la _ d or sea. Primary industries include a _ im _ l and crop f _ rm _ ng, fi _ hi _ g and mi _ ing.

Australia is a major im _ or _ er of secon _ ary products – that is, products that have been ma _ ufac _ ured or a _ sem _ led. These products include m _ chin _ ry, ele _ tr _ nic goods and tel _ com _ unicati _ ns e _ uipme _ t.

AUSTRALIA: DEFENCE AND TRADE 3

Trade and defence – general knowledge quiz

1 Answer true or false to these statements. Rewrite the false statements to make them correct.

a Manufacturing industries have declined over recent decades in Australia, so manufactured goods make up a significant amount of our imports.

b In 2006, Australia was a net exporter of crude petroleum.

c Australia is a major importer of primary products and a major exporter of telecommunications equipment.

d Australia tends to import manufactured goods because labour costs in this country mean it is difficult to compete with manufactured products from overseas.

e Australia is the biggest exporter of wool in the world, but its significance to our economy has declined considerably over the past 100 years – relative to other primary products.

f Iron ore earns Australia more export dollars than any other raw material.

g Australian troops are actively involved in peace-keeping in Pacific nations such as New Zealand and the Cook Islands.

h Army reserve and navy personnel patrol Australia's coast to help detect smuggling and illegal fishing.

i Members of the army, airforce and navy are not allowed to protect Australian embassies and consulates in overseas countries.

j Operation Catalyst is the name of the Australian rehabilitation task force in Iraq.

Effects on trade and defence

2 How has increased globalisation affected Australia's defence and trade?

3 Do you think Australia's defence policies are affected by trade considerations? Explain.

4 What effects do you think global terrorist activities could have on Australian defence and trade?

5 What trends do you expect to see in Australian defence and trade over the next 50 years?

SELECTED ANSWERS

Measuring Development and International Aid

Worksheets 1–2

- 1** Quantitative is a term that refers to measurement. A quantitative measurement is a measure of quantity, or amount
- 2** Because using a quantitative comparison to study the differences between poor and rich countries shows the amount of certain things that richer countries may have that poorer countries do not, and vice-versa
- 3** Because the UN considers the standard of living of developed versus developing countries to be distinctively different on average
- 4** Longevity, knowledge, standard of living
- 5** Teacher to check
- 6a** Quantitative data is numeric data
- b** The Human Development Index (HDI) is a measure of average achievements in three basic areas – life expectancy, knowledge and standard of living
- c** Gross Domestic Product (GDP) per capita is the amount of money a person earns on average in a specific country
- d** An index is a quantitative measure
- e** A developing country is one with much lower living conditions than a developed country
- f** A developed country has good living conditions for most of the people
- 7** Teacher to check. Encourage students to consider the effects of these factors: life expectancy, knowledge, standard of living, operation of social institutions such as schools, hospitals and the economy
- 8** Norway, at number 1

- 9** Niger, at number 177
- 10** Teacher to check. Encourage students to consider geographic location
- 11** Teacher to check. Encourage students to consider the distribution of wealth
- 12** Teacher to check. Encourage students to consider factors other than financial that contribute to human well-being
- 13** Teacher to check
- 14a** Adult literacy rates
- b** Life expectancy
- c** GDP
- d** Under five mortality
- e** Maternal mortality ratio
- 15** Generally speaking, these rates are higher in wealthier countries. Examples could include better education and better access to health services and nutritious food
- 16** Consider both government and non-government sources, and how each of these sources are organised to provide aid. To stimulate student ideas, ask them to consider television advertisements for aid and charity services
- 17** Teacher to check. Encourage students to consider the complexity of identifying who is most in need of aid, and how aid can be distributed most effectively

Worksheet 3

- 1** Most countries are relatively close to Australia
- 2–4** Teacher to check

Refugees and Migration

Worksheets 1–2

- 1a** Refugee
- b** Internally displaced person (IDP)
- c** Persons of concern
- d** Asylum seeker
- e** Convention
- 3** This data shows growth in refugees from 1980 to 1990

and then a steady decrease in both refugees and total persons of concern after 1990

- 4a** False
- b** True
- c** True
- d** True
- e** False
- f** False
- 5** Teacher to check
- 6** Teacher to check. Encourage students to consider Australia's involvement in the Vietnam war
- 7** Push factors encourage a person to leave their residence, city, state or country. A pull factor encourages people to move to a particular area
- 8** Teacher to check
- 9** (In order) 1982–3: 1, 2, 7, 3, 28, 9, 100
2004–5: 12, 10, 18, 5, 19, 2, 100
- 10a** 1982–3: 45 300
2004–5: 31 100
- b** Teacher to check
- 11** (In order) United Kingdom, New Zealand, China, India and Vietnam
- 12** (In order) New Zealand, China, India, South Africa
- 13** Teacher to check
- 14** (In order) family, marries, parents, reunite, skilled, shortage, employers, overseas, humanitarian, refugees, seekers

Worksheet 3

- 1a** True
- b** False (they are in fear of persecution)
- c** True
- d** True
- e** False (marginally more migrants from the UK)
- f** True
- 2** Yes
- 3** Agreement
- 4** c
- 5** d
- 6** b
- 7** a

Instant Lessons PowerPoint – Geography

Quality ready-to-use resources

Teach with a simple-to-use technology product featuring fully-illustrated slide sets and student worksheets that present curriculum in an engaging and interactive manner. Use the Geography PowerPoint series to supplement your existing resources, to introduce new topics or for revision and assessment purposes. This is a time-saving and easy-to-use resource with no additional preparation required.

This checklist highlights the major uses and benefits of these products.

Key features

Fully integrated slide and worksheet units that include extension tasks	✓	Teacher's notes and curriculum links	✓
Animated diagrams and full-colour illustrations	✓	Worksheet tasks and assessments in hard copy and on CD	✓
Key definitions and concepts are explained and illustrated	✓	Suitable for Windows and Mac users	✓

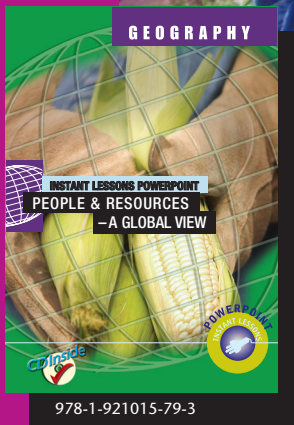

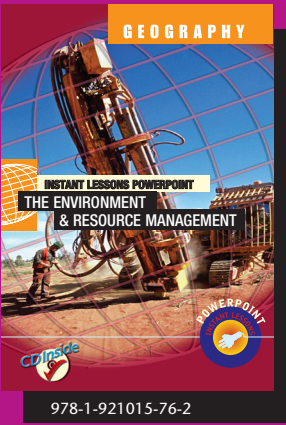

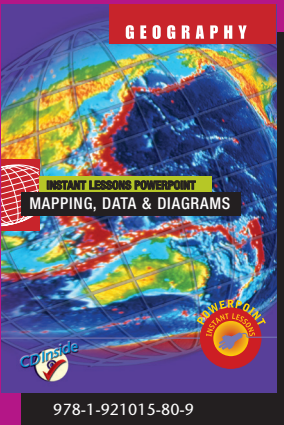

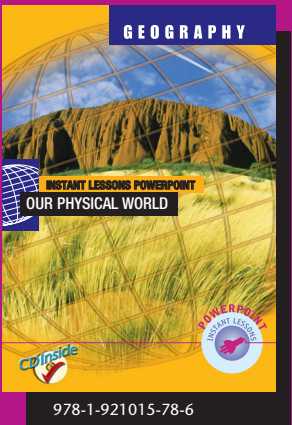

People, Politics and Economics

This title of five slide sets and the accompanying notes and worksheets examine how socio-economic indicators such as trade, migration and tourism influence people's quality of life and where they live. Topics include measuring wealth; international aid; the world's refugee problem; the importance and growth of international tourism to Australia; the key industries in which Australians work, such as agriculture and industry; and the nature of the defence and trade links Australia has with the rest of the world.

Slide sets

1: Measuring Development and International Aid 2: Refugees and Migration 3: International Tourism	4: Australia: People and Production 5: Australia: Defence and Trade
