DNA Structure Maze WORKSHEET

Name_____ Date_____

DNA Structure Maze

Directions: *Read the question in the START block. Select the answer to the question from the ch… that path to your next question. Complete the m… by following the correct path from START …*

START

What is the basic structure of a DNA molecule?

- It's double-stranded
- It's single-stranded

What makes up the "steps" of a DNA molecule?

- Phosphate groups
- 5-Carbon sugar
- Base pairs

T

What base does thymine pair up with?

- Guanine
- Thymine

What base does cytosine pair up with?

- C
- A

Adenine

What is one of the 3 parts to a nucleotide?

- Cytosine
- Adenine

What are the monomers of a DNA molecule?

- Ribose
- Nucleotides

What base does guanine pair up with?

- Cytosine
- Thymine

If a strand of DNA reads **A T C C**, what would the other side read?

- TAGG
- UAGG

If a strand of DNA reads **G G T C**, what would the other side read?

- CCAG
- GGTC

If a DNA molecule contains 30% cytosine, what … of the molecule should be thymine?

- 40%
- 10%
- 20%

How to GUIDE

Use this differentiated activity for formative or summative assessment of student understanding of the concepts of the basic structure of DNA.

Thank you! We hope you ♥ your Science from the South purchase.
♥ Heather

Hook into the Lesson

Challenge your students with completing the maze correctly on the first attempt. You may give them hints such as "all but one of the questions will be answered" or allow the students use of their notes. Hook them even more by offering a prize or reward for completion or make it a challenge to complete the activity first.

Use the Resource

Use the resource for practice, review, assessment, or evaluation of student understanding of the basic structure of DNA. Simply print the resource and allow the students to complete in class or for homework. Quickly assess for accuracy by using the answer key or allow the students to self-assess as a part of a station activity. If they complete it correctly, you can even use it for bonus points towards an assessment.

Differentiate

Multiple versions of the resource are provided for differentiation based on ability (simplified, intermediate, and advanced). Choose which version works best for you and each of your individual students. Pair students up with a partner if they need additional support or provide the use of hint cards.

Bump Up Engagement

Bump up engagement by making the activity a race to complete activity. Partner students up and allow the groups to compete against each other or provide students the opportunity to race against a timer. Have access to a poster machine? Blow up a copy of the maze, laminate, and use as a part of a station activity.

Edit

Do you need to change the wording or even some of the examples? Send us an email at sciencefromthesouth@gmail.com or share your email with us and a note of the changes you need by using the Product Q & A feature on the resource page. We can make the change for you or send an editable version of the student pages.

Incorporate Technology

This PDF is also digital. Access the digital version through TpT Easel. Or create your own digital version using the TpT Digital Activities Tool. Share with your students through TpT to Google Classroom or CLICK HERE to access the Digital Google Slides DNA Structure Maze and ANSWER KEY. Don't use Google Classroom? Share the pdf with your students and have them use a mark-up tool such as Kami.

Provide Feedback

Your 100% satisfaction is valued.

Feedback and ratings for product improvement are greatly appreciated. How can I make the resource better?

If you are dissatisfied with the resource, please contact me at sciencefromthesouth@gmail.com My best efforts will be made to modify the product to fit your needs.

Connect

Capture your students using the resource? Share it @iheartsciencefromthesouth for a prize!
